

## CONTENTS

<b>CHAPTER 1.</b>	<b>INTRODUCTION TO THE BASIC CONCEPTS OF AFFINITY CHROMATOGRAPHY</b>	<b>1</b>
1.1.	Nomenclature	5
1.2.	History of Bioselective Adsorption	7
1.3.	Some General Principles	9
1.4.	Some General Examples	10
	1.4.1. <i>DNA-Binding Proteins, 10</i>	
	1.4.2. <i>Plasminogen Purification, 13</i>	
	1.4.3. <i>FMN Purification on Apoflavodoxin-Agarose, 15</i>	
<b>CHAPTER 2.</b>	<b>MATRICES AND SPACER ARMS</b>	<b>20</b>
2.1.	Agarose	21
2.2.	Controlled Pore Glass	25
2.3.	Polyacrylamide	33
2.4.	Cellulose	36
2.5.	Other Matrices	37
2.6.	Spacer Arms	38
<b>CHAPTER 3.</b>	<b>SYNTHETIC METHODS</b>	<b>42</b>
3.1.	Attachment of Spacers to Matrices	42
	3.1.1. <i>CNBr-Activated Agarose, 42</i>	
	3.1.2. <i>Adipoyl Dihydrazide Agarose, 45</i>	
	3.1.3. <i>Periodate-Hydrazide Agarose, 45</i>	
	3.1.4. <i>Bisoxirane-Agarose, 48</i>	
	3.1.5. <i>Phloroglucinol-Agarose, 49</i>	
	3.1.6. <i>Divinylsulfone, 52</i>	
	3.1.7. <i>Other Methods For Activation of Agarose, 53</i>	
	3.1.8. <i>Alkylamine Derivatives of Porous Glass and Fused Silica, 57</i>	
	3.1.9. <i>Glycidoxy-Glass Beads, 58</i>	

	3.1.10. <i>Periodate-Activated Cellulose</i> , 60	
	3.1.11. <i>Bromoacetyl-Cellulose</i> , 61	
	3.1.12. <i>Derivates of Polyacrylamide</i> , 62	
3.2.	Attachment of Ligands to Spacer Arms and to Gel Matrices	67
	3.2.1. <i>Attachment by Amide Formation</i> , 67	
	3.2.2. <i>Succinylation of Amino Alkyl Porous Glass and Other Amine Inorganic Matrices</i> , 69	
	3.2.3. <i>Activation of Matrix-Bound Carboxylate Groups</i> , 70	
<b>CHAPTER 4.</b>	<b>THEORY AND PROBLEMS IN AFFINITY CHROMATOGRAPHY</b>	<b>85</b>
4.1.	A Qualitative Approach to Bioselective Adsorption	85
4.2.	Quantitative Approaches to the Theory of Bioselective Adsorption	88
	4.2.1. <i>The Equilibrium Model</i> , 89	
	4.2.2. <i>The Staged-Transfer Column Chromatographic Model</i> , 95	
4.3.	Pitfalls in Bioselective Adsorption	99
4.4.	Spacer Arm Effects	102
<b>CHAPTER 5.</b>	<b>GENERAL LIGANDS</b>	<b>109</b>
5.1.	Immobilized Coenzymes	109
	5.1.1. <i>Affinity Chromatography on NAD<sup>+</sup> (NADP<sup>+</sup>) Analogues</i> , 110	
5.2.	Analogues of ATP, ADP, and AMP for the Purification of Kinases	122
5.3.	Other Nucleotide-Utilizing Enzymes	124
5.4.	Cibacron Blue-Agarose and Blue Dextran- Agarose	128
5.5.	Coenzyme A-Binding Proteins	134
5.6.	Folate-Binding Proteins	136
5.7.	Coenzyme B <sub>12</sub>	139
5.8.	Thiamine-Binding Proteins	141
5.9.	Flavin-Binding Proteins	143

5.10.	Pyridoxal Enzymes	144
5.11.	Biotin-Binding Proteins	146
5.12.	Lipoic Acid	147
5.13.	Bioselective Adsorption of Glycoproteins on Immobilized Lectins	147
5.14.	Purification of Glycoproteins by Way of Immobilized Lectins	148
5.15.	Lectin Purification on Immobilized Sugar Derivatives	155
<b>CHAPTER 6.</b>	<b>COVALENT CHROMATOGRAPHY</b>	<b>163</b>
6.1.	Activated Thiols as Chromatographic Materials	163
6.1.1.	<i>Synthesis of Activated Glutathione- Agarose, 165</i>	
6.1.2.	<i>Application of Activated Glutathione- Agarose, 166</i>	
6.1.3.	<i>Synthesis and Use of Thiopropyl- Agarose, 169</i>	
6.1.4.	<i>Synthesis and Use of Organomercurial Agarose, 173</i>	
6.2.	Use of Quasisubstrates as Covalent Chromatography Packings	180
<b>CHAPTER 7.</b>	<b>BIOSELECTIVE ELUTION</b>	<b>187</b>
7.1.	Theory of Bioselective Elution	197
7.2.	Bioselective Elution from Hydrophobic Amphilytes	202
7.3.	Analytical Bioselective Elution— A Microassay for 3'5'-Cyclic AMP	203
<b>CHAPTER 8.</b>	<b>DNA-RNA AFFINITY CHROMATOGRAPHY</b>	<b>208</b>
8.1.	Synthesis and Use of DNA-Cellulose Chromatography	208
8.2.	Alternative Methods of DNA-Cellulose Synthesis	216
8.3.	Poly(dT) and Oligo(dT)-Cellulose as mRNA Selective Agents	217

8.4.	Synthesis and Application of Poly(U) Cellulose and Poly(U) Agarose to mRNA Purification	223
8.5.	DNA Attached to Matrices Other Than Cellulose	227
8.6.	Immobilization of RNA	230
<b>CHAPTER 9.</b>	<b>HYDROPHOBIC CHROMATOGRAPHY</b>	<b>241</b>
9.1.	Hydrophobic Interactions with Proteins	241
9.2.	Nomenclature in Hydrophobic Chromatography	245
9.3.	History of Hydrophobic Chromatography	246
9.4.	Problems Encountered in Hydrophobic Chromatography	249
9.5.	Examples of Hydrophobic Chromatography	251
9.5.1.	<i>Plant Aminoacyl-tRNA Synthetases, 251</i>	
9.5.2.	<i>Yeast <math>\alpha</math>-Isopropylmalate Isomerase, 253</i>	
9.5.3.	<i>Purification of Detergent-Solubilized Membrane Proteins, 256</i>	
9.5.4.	<i>High-Pressure Hydrophobic Chromatography of Protein, 259</i>	
9.6.	Hydrophobic-Active Site Containing Proteins	260
9.7.	Design and Application of Hydrophobic Chromatography Systems	265
<b>CHAPTER 10.</b>	<b>ANTIBODY-ANTIGEN AND OTHER PROTEIN-PROTEIN INTERACTIONS IN AFFINITY CHROMATOGRAPHY</b>	<b>272</b>
10.1.	Immunosorbents as Bioselective Adsorbents	272
10.2.	Hapten Antibodies	275
10.3.	Examples of Antibody Purification by Bioselective Adsorption	276
10.4.	Elution Methods for Immunosorbents	281
10.5.	Hapten Purification on Immunosorbents	286
10.6.	Potential Medical Uses of Immunosorbents and Other Bioselective Adsorbents	289
10.7.	Other Purifications Based on Bioselective Protein-Protein Interactions	293
10.8.	Protease-Protein Interactions	294

**CONTENTS**

xiii

10.9.	Bioselective Adsorption Through Subunit Interactions	296
-------	--	-----

**CHAPTER 11. OTHER APPLICATIONS 305**

11.1.	Purification of Whole Cells and Virus	305
11.2.	Affinity Density Perturbation	309
11.3.	Affinity Electrophoresis	312
11.4.	Affinity Partitioning	317
11.5.	Immobilized Protein-Modification Reagents	320
11.6.	Affinity Drugs	328
11.7.	Separation of Enantiomers	331
11.8.	Solid-Phase Radioimmunoassay and Enzyme-Linked Immunoassay	333

**INDEX 339**
