Volume I

Chapter 1 Free Flavins: Syntheses Chemical and Physical Properties	1
Chapter 2 Structure, Synthesis, and Physical Properties of Covalently Bound Flavins and 6- and 8-Hydroxyflavins	73
Chapter 3 Roseoflavin, Nekoflavin, and Schizoflavin	105
Chapter 4 Syntheses and Properties of 5-Deazaflavins	121
Chapter 5 The Photochemistry of Flavins	171
Chapter 6 Flavin Metabolites	195
Chapter 7 Medical Aspects of Vitamin B2	201
Chapter 8 Biosynthesis of Flavins	215
Chapter 9 Methods used to Reversibly Resolve Flavoproteins into the Constituents Apoflavoprotein and Prosthetic Group	261
Chapter 10 Flavoproteins in Medicine	275
Chapter 11 Riboflavin-Binding Proteins	287
Chapter 12 The Lumaazine Synthase/Riboflavin Synthase Complex of Bacillus Subtilis	293
Chapter 13 DNA Photolyase and the Role of Flavin in DNA Repair	317
Chapter 14 Cellobiose Oxidoreductases	337
Chapter 15 Riboflavin Kinase and FAD Synthetase	349
Chapter 16 Mammalian Methylenetetrahydrofolate Reductase	371
Chapter 17 5,10-Methylenetetrahydrofolate Reductases: Iron-Sulfur-Zinc Flavoproteins of Two Acetogenic Clostridia	389
Chapter 18 Redox Properties of Flavins and Flavoproteins	401
