Part I: Structure and function of enzymes

| | |
|---|----|
| 1 An introduction to enzymes | |
| 1.1 What are enzymes? | 19 |
| 1.2 A brief history of enzymes | 19 |
| 1.3 The naming and classification of enzymes | 20 |
| Summary of Chapter 1 | 28 |
| Further reading | 28 |
| Problems | 28 |
| 2 The structure of proteins | |
| 2.1 Introduction | 31 |
| 2.2 Amino acids, the building blocks of proteins | 32 |
| 2.3 The basis of protein structure | 35 |
| 2.4 The determination of primary structure | 39 |
| 2.5 The determination of protein structure by X-ray crystallography | 47 |
| 2.6 The investigation of protein structure in solution | 56 |
| Summary of Chapter 2 | 57 |
| Further reading | 57 |
| Problems | 57 |
| 3 The biosynthesis and properties of proteins | |
| 3.1 The biosynthesis of proteins | 59 |
| 3.2 The properties of proteins | 68 |
| Summary of Chapter 3 | 76 |
| Further reading | 77 |
| Problems | 77 |
| 4 Specificity of enzyme action | |
| 4.1 Types of specificity | 78 |
| 4.2 The active site | 79 |
| 4.3 The Fischer 'lock-and-key' hypothesis | 81 |
| 4.4 The Koshland 'induced-fit' hypothesis | 81 |
| 4.5 Hypotheses involving strain or transition-state stabilization | 83 |
| 4.6 Further comments on specificity | 85 |
| Summary of Chapter 4 | 85 |
| Further reading | 86 |
| 5 Monomeric and oligomeric enzymes | |
| 5.1 Monomeric enzymes | 87 |
| 5.2 Oligomeric enzymes | 90 |

| | |
|---|-----|
| Summary of Chapter 5 | 95 |
| Further reading | 95 |
| Part 2: Kinetic and chemical mechanisms of enzyme-catalysed reactions | |
| 6 An introduction to bioenergetics, catalysis and kinetics | |
| 6.1 Some concepts of bioenergetics | 98 |
| 6.2 Factors affecting the rates of chemical reactions | 102 |
| 6.3 Kinetics of uncatalysed chemical reactions | 106 |
| 6.4 Kinetics of enzyme-catalysed reactions: an historical introduction | 109 |
| 6.5 Methods used for investigating the kinetics of enzyme-catalysed reactions | 111 |
| 6.6 The nature of enzyme catalysis | 114 |
| Summary of Chapter 6 | 115 |
| Further reading | 116 |
| Problems | 116 |
| 7 Kinetics of single-substrate enzyme-catalysed reactions | |
| 7.1 The relationship between initial velocity and substrate concentration | 118 |
| 7.2 Rapid-reaction kinetics | 129 |
| 7.3 The King and Altman procedure | 135 |
| Summary of Chapter 7 | 137 |
| Further reading | 137 |
| Problems | 138 |
| 8 Enzyme inhibition | |
| 8.1 Introduction | 139 |
| 8.2 Reversible inhibition | 139 |
| 8.3 Irreversible inhibition | 160 |
| Summary of Chapter 8 | 162 |
| Further reading | 163 |
| Problems | 163 |
| 9 Kinetics of multi-substrate enzyme-catalysed reactions | |
| 9.1 Examples of possible mechanisms | 166 |
| 9.2 Steady-state kinetics | 168 |
| 9.3 Investigation of reaction mechanisms using steady-state methods | 173 |
| 9.4 Investigation of reaction mechanisms using non-steady-state methods | 178 |
| Summary of Chapter 9 | 180 |
| Further reading | 181 |
| Problems | 181 |
| 10 The investigation of active site structure | |
| 10.1 The identification of binding sites and catalytic sites | 185 |
| 10.2 The investigation of the three-dimensional structures of active sites | 197 |
| Summary of Chapter 10 | 199 |
| Further reading | 200 |

| | |
|---|-----|
| Problems | 200 |
| 11 The chemical nature of enzyme catalysis | |
| 11.1 An introduction to reaction mechanisms in organic chemistry | 201 |
| 11.2 Mechanisms of catalysis | 203 |
| 11.3 Mechanisms of reactions catalysed by enzymes without cofactors | 206 |
| 11.4 Metal-activated enzymes and metalloenzymes | 211 |
| 11.5 The involvement of coenzymes in enzyme-catalysed reactions | 216 |
| Summary of Chapter 11 | 229 |
| Further reading | 229 |
| 12 The binding of ligands to proteins | |
| 12.1 Introduction | 230 |
| 12.2 The binding of a ligand to a protein having a single ligand-binding site | 230 |
| 12.3 Cooperativity | 231 |
| 12.4 Positive homotropic cooperativity and the Hill equation | 232 |
| 12.5 The Adair equation for the binding of a ligand to a protein having two binding sites for that ligand | 235 |
| 12.6 The Adair equation for the binding of a ligand to a protein having three binding sites for that ligand | 239 |
| 12.7 The Adair equation for the binding of a ligand to a protein having four binding sites for that ligand | 240 |
| 12.8 Investigation of cooperative effects | 240 |
| 12.9 The binding of oxygen to haemoglobin | 244 |
| Summary of Chapter 12 | 245 |
| Further reading | 245 |
| Problems | 246 |
| 13 Sigmoidal kinetics and allosteric enzymes | |
| 13.1 Introduction | 247 |
| 13.2 The Monod-Wyman-Changeux (MWC) model | 247 |
| 13.3 The Koshland-Nemethyl-Filmer (KNF) model | 253 |
| 13.4 Differentiation between models for cooperative binding in proteins | 256 |
| 13.5 Sigmoidal kinetics in the absence of cooperative binding | 257 |
| Summary of Chapter 13 | 259 |
| Further reading | 259 |
| Problems | 260 |
| 14 The significance of sigmoidal behaviour | |
| 14.1 The physiological importance of cooperative oxygen-binding by haemoglobin | 263 |
| 14.2 Allosteric enzymes and metabolic regulation | 265 |
| Summary of Chapter 14 | 278 |
| Further reading | 279 |
| Part 3: Application of enzymology | |

| | |
|--|-----|
| 15 Investigation of enzymes in biological preparations | |
| 15.1 Choice of preparation for the investigation of enzyme characteristics | 283 |
| 15.2 Enzyme assay | 285 |
| 15.3 Investigation of sub-cellular compartmentation of enzymes | 293 |
| Summary of Chapter 15 | 298 |
| Further reading | 299 |
| Problem | 299 |
| 16 Extraction and purification of enzymes | |
| 16.1 Extraction of enzymes | 301 |
| 16.2 Purification of enzymes | 306 |
| 16.3 Determination of molecular weights of enzymes | 314 |
| Summary of Chapter 16 | 316 |
| Further reading | 316 |
| Problem | 316 |
| 17 Enzymes as analytical reagents | |
| 17.1 The value of enzymes as analytical reagents | 318 |
| 17.2 Principles of enzymatic analysis | 319 |
| 17.3 Handling enzymes and coenzymes | 327 |
| Summary of Chapter 17 | 328 |
| Further reading | 329 |
| Problems | 329 |
| 18 Instrumental techniques available for use in enzymatic analysis | |
| 18.1 Principles of the available detection techniques | 330 |
| 18.2 Automation in enzymatic analysis | 338 |
| Summary of Chapter 18 | 345 |
| Further reading | 345 |
| 19 Some applications of enzymatic analysis in medicine and industry | |
| 19.1 Applications in medicine | 346 |
| 19.2 Applications in industry | 355 |
| Summary of Chapter 19 | 357 |
| Further reading | 357 |
| 20 Biotechnological applications of enzymes | |
| 20.1 Large-scale production of enzymes | 358 |
| 20.2 Immobilized enzymes | 360 |
| 20.3 Enzyme utilization in industry | 369 |
| 20.4 Enzyme and recombinant DNA technology | 372 |
| Summary of Chapter 20 | 381 |
| Further reading | 382 |
| Problems | 383 |
| Answers to problems | 384 |
