

CONTENT

1. APPLICATION OF HPLC TO THE ASSAY OF ENZYMATIC ACTIVITIES	1
1.1 Introduction	1
1.2 Anatomy of an Enzyme Assay,	2
1.3 Classification of Enzymatic Assay Methods,	4
1.4 Criteria for the Selection of an Assay Method,	8
1.5 Summary and Conclusions,	13
2. CONCEPTS AND PRINCIPLES OF HIGH PERFORMANCE LIQUID CHROMATOGRAPHY	15
2.1 Introduction,	15
2.2 The Introduction of HPLC,	16
2.3 Basic Components and Operation,	17
2.4 Coupling the Components: On the Perils of Ferrules,	19
2.5 The Chromatogram.	20
2.6 Interpretation of the Chromatogram.	23
2.7 The Selection of the Stationary Phase: Some Help from an Understanding of the Process of Separation	27
2.8 Composition and Preparation of the Mobile Phase	40
2.9 Column Maintenance,	42
2.10 Monitoring Column Performance.	43
2.11 Summary and Conclusions,	44
General References.	45
3. STRATEGY FOR DESIGN OF AN HPLC SYSTEM FOR ASSAY OF ENZYME ACTIVITY	49
3.1 Setting Up the Assay,	49
3.2 The Use of HPLC to Establish Optimal Conditions for the Enzymatic Reaction,	69
References,	79
General References,	79
4. STRATEGY FOR THE PREPARATION OF ENZYMATIC ACTIVITIES FROM TISSUES, BODY FLUIDS, AND SINGLE CELLS	81
4.1 Introduction	83
4.2 Preparation and Assay of Enzymatic Activities in Samples of Tissues, Organs, and Biological Fluids,	87
4.3 Preparation and Assay of Activities in Intact Cells,	94
4.4 Preparation and Assay of Activities in Subcellular Samples,	95
4.5 Initial Purification and Assay of Activities in Cell-Free Lysates,	97
4.6 HPLC for Purification of Enzymes: A Brief Background,	98
4.7 Strategy for Use of HPLC in the Purification of Activities,	101

4.8 Problems Related to the Assay of Activities following their Purification by HPLC,	105
4.9 Summary and Conclusions,	107
General References,	107
5. SURVEY OF ENZYMATIC ACTIVITIES ASSAYED BY THE HPLC METHOD	109
5.1 Introduction,	110
5.2 Catecholamine Metabolism,	110
5.3 Proteinase,	122
5.4 Amino Acid Metabolism,	133
5.5 Polyamines,	141
5.6 Heme Biosynthesis,	142
5.7 Carbohydrate Metabolism,	145
5.8 Steroid Metabolism,	161
5.9 Purine Metabolism,	164
5.10 Oxygenations,	193
5.11 Pterin Metabolism,	199
5.12 Sulfur Metabolism,	207
5.13 Summary and Conclusions,	211
References,	212
General References,	215
6. MULTIENZYME SYSTEMS	217
6.1 Introduction ,	217
6.2 Assay of Two Activities Forming Different Products from the Same Substrate,	218
6.3 Assay of Two Activities Forming the Same Product from the Same Substrate,	222
6.4 Formation of Two Separate Products from Two Separate Substrates by the Same Activity,	228
6.5 Assay of a Multienzyme Complex by the Reconstitution Method,	229
6.6 Assay of a Multienzyme Complex Using the HPLC Method,	234
References,	236
General References,	237
