

CONTENT

1 Introduction	1
2 Chemical and biological nature of the water-soluble	10
3 Analytical considerations	99
4 Extraction of the water-soluble vitamins	121
5 Physicochemical methods (excluding HPLC) for determining thiamin, riboflavin, niacin, vitamin B6 pantothenic acid and vitamin C	142
6 High-performance liquid chromatographic methods for the determination of thiamin, riboflavin, niacin, vitamin B6, folate and vitamin C	203
7 Microbiological methods for the determination of the B-group vitamins	317
8 Biospecific methods for the determination of water-soluble vitamins	365
9 Appraisal of analytical techniques	387
Index	410
