

CONTENT

GENERAL INTRODUCTION	1
I. GENERAL TECHNIQUE	
THE THERMOSTAT	7
1. Measurement and Adjustment of pH	10
Measurement of pH with Indicators	15
Measurement of pH by means of Concentration Chains	20
2. General Methods of Purification	30
II. BIOLOGICAL MATERIALS AND TRANSFORMATIONS	
A. SUBSTRATES	
1. Proteins	47
2. Carbohydrates	65
3. Nucleins	80
4. Lipins	87
B. ENZYMIC HYDROLYSES	
1. Proteases	103
2. Carbohydrases	121
3. Esterases	136
C. RESPIRATION AND FERMENTATION	
I. The Biological Activation of Hydrogen. The Dehydrogenases	139
Biological Dehydrogenation. Method of using Acceptors	148
Oxidation-reduction Potential	173
II. Oxidative Enzymes containing Heavy Metal	197
III. Glycolysis	233
Alycoholic Fermentation	233
Determination of the Fermenting Power of Dried Yeast	249
Animal Glycolysis	253
Determination of Lactic Acid Production in Muscle Extracts	264
Bacterial Lactic Acid Production	269
INDEX	273
