

CONTENT

1 The Scope of Biochemistry	1
2 Methods of Biochemistry	9
3 The Ionic Environment and Buffers	42
4 Amino Acids and Peptides	74
5 Proteins	102
6 Enzymes	141
7 Nucleotides and Nucleic Acids	186
8 Carbohydrates	216
9 Lipids and Biomembranes	244
10 Organization of Living Cells and Membrane Transport	267
11 Energetics and High-Energy Compounds	289
12 Carbohydrate Metabolism	312
13 Citric Acid Cycle	357
14 Oxidative Phosphorylation	389
15 Photosynthesis	418
16 Lipid Metabolism	441
17 Amino Acid Metabolism	470
18 Nucleotide metabolism and Nucleic Acid Biosynthesis	502
19 Protein Biosynthesis and Regulation of Gene Function	549
Appendixes	
I. Literature Sources in Biochemistry and Related Sciences	AI
II. A Partial Listing of Genetic Disorders in Man and the Malfunctional or Deficient Protein or Enzyme	A3
III. Table of logarithms	A5
Index	II
