

CONTENT

|       |   |     |
|-------|---|-----|
| I.    | INTRODUCTION                                    | 1   |
| II.   | THE HYDROLYSIS PRODUCTS OF THE NUCLEIC          | 7   |
| III.  | CHROMATOGRAPHY AND ULTRAVIOLET ABSORPTION       | 24  |
| IV.   | THE STRUCTURE AND PROPERTIES OF POLYNUCLEOTIDES | 35  |
| V.    | NUCLEASES AND RELATED ENZYMES                   | 65  |
| VI.   | HISTOCHEMISTRY OF THE NUCLEIC ACIDS             | 78  |
| VII.  | CHEMICAL METHODS FOR NUCLEIC ACID ESTIMATION    | 93  |
| VIII. | THE NUCLEIC ACID CONTENT OF TISSUES             | 104 |
| IX.   | NUCLEIC ACIDS IN THE CYTOPLASM                  | 122 |
| X.    | THE CELL NUCLEUS                                | 135 |
| XI.   | THE CATABOLISM OF THE NUCLEIC ACIDS             | 164 |
| XII.  | THE BIOSYNTHESIS OF MONONUCLEOTIDES             | 171 |
| XIV.  | THE BIOLOGICAL FUNCTION OF RNA                  | 231 |
| XV.   | THE BIOLOGICAL FUNCTION OF DNA                  | 253 |
| XVI.  | NUCLEIC ACIDS IN VIRUSES                        | 267 |
|       | INDEX   | 280 |
