

## CONTENT

## PART ONE

CHAPTER I: THE BIOSPHERE	1
CHAPTER II: CONSTITUENTS OF THE BIOSPHERE	7
I. THE THREE PRINCIPAL BIOCHEMICAL STRUCTURES	8
II. OTHER CHEMICAL STRUCTURES OF GENERAL INTEREST	30
CHAPTER III: MODES OF LINKAGE BY COVALENT BONDS	57
I. "OSIDE" LINKAGE	57
II. ESTER LINKAGE (AND ANHYDRIDE LINKAGE)	61
III. PEPTIDE BOND	77
CHAPTER IV: MACROMOLECULES	83
I. POLYSACCHARIDES	85
II. PROTEINS	93
III. NUCLEOPROTEINS	107
IV. METALLOPROTEINS	111
V. LIPOPROTEINS	127

## PART TWO-ENZYMES AND BIOCHEMICAL ENERGETICS

CHAPTER I: GENERAL PRINCIPLES OF BIOCHEMISTRY	131
I. FREE ENERGY	131
II. ENERGY COUPLING	136
III. ENERGY RICH BONDS	137
IV. THE PHOSPHATE CYCLE	138
V. BIOLOGICAL OXIDO-REDUCTIONS AND THE GENERATION OF ENERGY-RICH BONDS	138
VI. THE CELLULAR DYNAMO	1456
VII. THE PYROPHOSPHATE BOND AND CELLULAR WORK	146
VIII. CHEMICAL EQUILIBRIUM AND THE STATIONARY STATE	147
CHAPTER II: ENZYMES	151
I. DEFINITION	151
II. ENZYMES AND ACTIVATIONS	152
III. CLASSIFICATION OF ENZYMES	152
IV. KINETICS	166
V. THE MECHANISM OF ACTION OF ENZYMES AND COENZYMES	171

## PART THREE-CHEMICAL REACTIONS IN THE BIOSPHERE

INTRODUCTION	179
--------------	-----

CHAPTER I: DESTRUCTIVE AND NON-DESTRUCTIVE METHODS IN MODERN BIOCHEMISTRY	181
I. FROM THE WHOLE ORGANISM TO THE PURE ENZYME	181
II. BIOCHEMICAL INVESTIGATION AND THE USE OF ISOTOPES	182
III. THE USE OF MUTANT STRAINS OF MICRO-ORGANISMS	184
CHAPTER II: PRIMING REACTIONS	186
I. GLYCOLYSIS AND THE EXOSEMONOPHOSPHATE SHUNT	186
II. ANOTHER PATHWAY FOR THE PRODUCTION OF ACETYL-COA: THE FATTY ACID CYCLE	196
III. THE TRICARBOXYLIC ACID CYCLE	199
IV. RESPIRATORY CHAINS	207
V. MECHANISMS FOR THE BREAKDOWN OF AMINO ACIDS	209
VI. INTERRELATIONS BETWEEN PRIMING REACTIONS	223
VII. ENERGETICS OF THE PRIMING REACTIONS	223
CHAPTER III: BIOSYNTHESIS	229
I. THE MATERIALS FOR BIOSYNTHESIS	229
II. BIOSYNTHESIS	230
PART FOUR-TOPOBIOCHEMISTRY AND CELLULAR REGULATION	
CHAPTER I: CELLULAR TOPOCHEMISTRY	273
CHAPTER II: CELLULAR REGULATION	283
I. FACTORS WHICH DETERMINE THE VELOCITY AND THE PATH OF ENZYMATIC REACTION CHAINS	283
II. THE PASTEUR EFFECT	285
III. THE GENETIC CONTROL OF THE RELATIVE RATES OF ENZYMATIC REACTIONS	286
PART FIVE-BIOCHEMICAL DIVERSITY	
CHAPTER I: SOME ASPECTS OF BIOCHEMICAL DIVERSITY	289
I. TERPENES	289
II. PORPHYRINS	301
III. PROTEIN MACROMOLECULES	301
CHAPTER II: THE INHERITANCE OF BIOCHEMICAL CHARACTERISTICS	304
I. CONTROL OF BIOCHEMICAL CHARACTERISTICS BY GENES	304
II. BIOCHEMICAL DIFFERENTIATION OF CELLS IN A SINGLE ORGANISM	305
III. PHENOTYPE AND "MILIEU"	315
CHAPTER III: BIOCHEMISTRY AND TAXONOMY	317
I. BIOCHEMICAL DIVERSITY	317
II. DIVERSITY WITHIN SPECIES	323
III. DIVERSITY BETWEEN SPECIES	323
CHAPTER IV: BIOCHEMICAL EVOLUTION	333
I. DEFINITION	333

II. EVOLUTION OF BIOCHEMICAL CONSTITUENTS	333
III. EVOLUTION OF BIOCHEMICAL SYSTEMS	333
PART SIX-THE METABOLISM OF THE BIOSPHERE	
INTRODUCTION	349
CHAPTER I: ENTRY INTO THE BIOSPHERE	351
I. CARBON AND ENERGY	351
II. PHOSPHORUS	361
III. NITROGEN	362
IV. SULPHUR	364
CHAPTER II: DEPARTURE FROM THE BIOSPHERE	366
I. AMMONIFICATION IN THE SOIL	366
II. THE EXIT OF CARBON FROM THE BIOSPHERE	368
CHAPTER III: THE CYCLES	371
I. THE CARBON CYCLE	371
II. THE NITROGEN CYCLE	371
III. THE SULPHUR CYCLE	376
IV. THE CIRCULATION OF PHOSPHORUS	377
V. THE METABOLISM OF THE BIOSPHERE	381
INDEX	381
