

CONTENT

Chapter 1	
ASPARTATE TRANSCARBAMYLASE	
1. Structure of ATCase	2
2. Cooperativity between the Catalytic Sites	8
3. Influence of the Effectors CTP, UTP, and ATP (PSE Mechanism)	12
Chapter 2	
MOLECULAR GENETICS: REGULATION OF ASPARTATEK TRANSCARBAMYLASE BIOSYNTHESIS	
1. The AtCase Operon and Its Regulation	17
2. Experiment Determinations: Measurement of the Lagtime for Derepression and Repression of Atcase Operon Expression	19
Chapter 3	
PURIFICATION OF ASPARTATE TRANSCARBAMYLASE AND ITS SUBUNITS	
1. Purification of ATCase	25
2. Dissociation of ATCase into Catalytic and Regulatory Subunits	28
3. Reconstitution of ATCase from Its Isolated Catalytic and Regulatory Subunits	32
Chapter 4	
STRUCTURAL AND PHYSICOCHEMICAL STUDY OF ASPARTATE TRANSCARBAMYLASE	
1. Absorption Spectrophotometry and Determination of Protein Concentration	33
2. Analysis by Electrophoresis	39
3. Analytical Ultracentrifugation	57
4. Size Exclusion Chromatography	70
Chapter 5	
ENZYMATIC CATALYSIS AND REGULATION	
1. Theoretical Aspects	91
2. Experimental Approach	115
Chapter 6	
COMPLEMENTARY EXPERIMENTS	
1. Molecular Biology	141
2. Physical Chemistry	141
3. Enzyme Kinetics	142
APPENDIX	
1. Equations and Units	143
2. Molar Mass and Molecular Mass	144

3. Units of Catalytic Activity	145
4. Units of Radioactivity	147
5. Units of Quantity	147
6. k Factor of the Ultracentrifuge Rotor	147
7. Calculation of Acceleration	148
8. Bacterial Strains	148
9. Solutions and Reagents	148
10. Preparation of Standard Protein Mixtures for Column Calibration	151
ANSWERS TO QUESTIONS	153
REFERENCES	159
