

## CONTENT

1.	ACID-BASE CHEMISTRY	1
	A. Aqueous Solutions	1
	B. Equilibrium Constants	10
	C. Acids and Bases	12
	D. Laboratory Buffers	33
	E. Amino Acids and Peptides	d69
	F. Blood Buffers	83
	Practice Problems	91
2.	CHEMISTRY OF BIOLOGICAL MOLECULES	94
	A. Amino Acids, Peptides, and Proteins	94
	B. Carbohydrates	123
	C. Lipids	129
	D. Nucleotides and Nucleic Acids	135
	Practice Problems	141
3.	BIOCHEMICAL ENERGETICS	145
	A. Energy-Yielding and Energy-Requiring Reactions	145
	B. Calculations of Equilibrium Concentrations	169
	C. Oxidation-Reduction Reactions	172
	D. Metabolism and ATP Yield	181
	E. Photosynthetic Phosphorylation	188
	F. Active Transport	193
	G. Enthalpy and Entropy	197
	H. Activation Energy	203
	Practice Problems	205
4.	ENZYMES	208
	A. Enzymes as Biological Catalysts	208
	B. Enzyme Kinetics	214
	C. Reaction Order	225
	D. Methods of Plotting Enzyme Kinetics Data	233
	E. Enzyme Inhibition	246
	F. Effect of pH on Enzyme Stability and Activity	273
	G. Effect of Temperature on Enzyme Stability and Activity	277
	H. Enzyme Assays	281
	I. Multisubstrate Enzymes and Kinetic Mechanisms	293
	J. Multisite and Allosteric Enzymes	303
	K. Enzyme Turnover	317

Practice Problems	319
5. SPECTROPHOTOMETRY AND OTHER OPTICAL METHODS	324
A. Spectrophotometry	324
B. Fluorometry	346
C. Optical Rotation-Polarimetry	348
Practice Problems	352
6. ISOTOPES IN BIOCHEMISTRY	354
A. Isotopes and Radioactive Decay	354
B. Solutions of Radioactive Compounds	363
C. Assays Using Radioactive Substrates	366
D. Double-Label Analysis	373
E. Biological Half-Life-Turnover	376
F. Radioactive Tracer and Dilution Analyses	383
G. Counting Errors	391
H. Stable Isotopes	393
Practice Problems	394
APPENDICES	397
I. Properties of Commercial Concentrated Solutions of Acids and Bases	399
II. Fractionation with Solid Ammonium Sulfate	400
III. Fractionation with Saturated Ammonium Sulfate Solution	401
IV. pKa Values of Acids and Bases Useful in Preparing Buffers	403
V. Activity Coefficients of Some Ions in Aqueous Solution	407
VI. pKa Correction Factors for Ionic Strength	408
VII. Ionization Constants, pKa, pKb. And pI Values of Some Common Amino Acids	409
VIII. $\Delta G'$ Values for the Hydrolysis of Some Compounds of Biological Importance	412
IX. Standard Reduction Potentials of Some Oxidation Reduction Half-Reactions	414
X. Absorption Maxima and Absorption Coefficients of Some Compounds of Biochemical Importance	416
XI. Specific Rotation of Some Carbohydrates and Derivatives	418
XII. Radioisotopes Used in Biological Research	419
ANSWERS TO PRACTICE PROBLEMS	421
LOGARITHMS	431
ATOMIC NUMBERS AND ATOMIC WEIGHTS OF THE ELEMENTS	434
INDEX	435
