

## CONTENT

### Part 1 General Principles

1 INTRODUCTION AND HISTORY	3
2 CHEMICAL AND HYDROGEN-ION EQUILIBRIA	7
3 METAL ION EQUILIBRIA	28
4 ISOLATION METHODS	42
5 CRITERIA OF PURITY	57
6 CHARACTERIZATION	66

### Part 2 Physical Chemistry

7 REACTION RATES	87
8 EFFECT OF SUBSTRATE CONCENTRATION ON VELOCITY	94
9 ACTION OF INHIBITORS	110
10 EFFECT OF TEMPERATURE	123
11 EFFECT OF HYDROGEN-ION CONCENTRATION	128
12 ENERGETICS	135
13 OXIDATION-REDUCTION	160
14 ENZYME-SUBSTRATE COMPOUNDS	174
15 SPECIFICITY OF ENZYMES	185
16 MECHANISM OF ENZYME ACTION	189

### Part 3 Types of Coenzymes and Enzymes

17 CLASSIFICATION OF COENZYMES	203
18 CLASSIFICATION OF ENZYMES	239
19 RESPIRATORY ENZYMES	246
20 PROTEOLYTIC ENZYMES	279

### Part 4 Metabolic Patterns

21 METABOLIC PROCESSES	295
22 GLYCOLYSIS	309
23 HEXOSE MONOPHOSPHATE SHUNT	324
24 TRICARBOXYLIC ACID CYCLE AND OXIDATIVE PHOSPHORYLATION	333
25 FATTY ACID OXIDATION	348
26 NUCLEOTIDE DERIVATIVES	359
27 THE SYNTHESIS OF ENZYMES	369
APPENDIX ALPHABETICAL LIST OF ENZYMES	385
INDEX	407
