

CONTENT

TESTS FRO PHYSICAL & CHEMICAL PROPERTIES	
Hydrolysis Protocols-Effects of Water on the Environmental Fate of Chemicals	1
Factors Affecting Pesticide Photodecomposition Studies	20
Measurement and Interrelation of Octanol-Water Partition Coefficient and Water Solubility of Organic Chemicals	28
TESTS FOR MOBILITY- SOIL & WATER	
Soil Leaching Tests for Toxic Organic Chemicals	43
Measurement of Sorption Coefficients of Organic Chemicals and Their Use in Environmental Fate Analysis	89
Evaluating Volatility of Toxicants in Soil and Water	110
TESTS FOR METABOLISM-ACCUMULATION/DEGRADATION	
Standardized Soil Degradation Studies	122
Test Methods for Determining the Biodegradation of Organic Chemicals in the Aquatic Environment	150
Measuring the Potential for and Evaluating the Significance of Contamination of Aquatic organisms By Chemical Residues	168
Test Methods for Microbial Metabolism: Effects of Pesticides on Microbes and Microbes on Pesticides	177
Runoff Studies and Pesticide Registration	200
Rotational Crop Studies	206
MODELS	
Development and Use of Models in the Regulation Of Pesticides	213
Model Ecosystems in Fate and Movement of Toxicants	214
Mathematical Prediction of Toxicant Transport Through Soil	233
Role of Mathematical Models for Environmental Assessment of Toxicants	251
EPA Coordination with the Organization for Predicting the Environmental Fate of Organic Priority Pollutants	263
Biodegradability Studies for Predicting the Environmental Fate of Organic Priority Pollutants	267
Closing –Overview and Future Prospects	329
