

CONTENT

1. Organic Pesticide Pollution in an Aquatic Environment	1
2. Liquid-Liquid Extraction of Organic Pesticides from Water: The p-Value Approach to Quantitative Extraction	11
3. Confirmation of Pesticide Residues by Mass Spectrometry and NMR Techniques	26
4. Interaction of Organic Pesticides with Particulate Matter in Aquatic and Soil Systems	55
5. Sorption from Aqueous Solutions by Organic Clays: 1,2,4-D By Bentonite	121
6. Herbicidal Residues in Aquatic Environments	135
7. Interaction of Organic Pesticides with Natural Organic Polyelectrolytes	149
8. The Rates of Photodecomposition of Picloram in Aqueous Systems	159
9. The Photodecomposition of Pesticides in Water	173
10. Chemical Hydrolysis and Oxidation of Parathion and Paraoxon in Aquatic Environments	189
11. Studies of the Persistence of Some Carbamate Insecticides in the Aquatic Environment	211
12. Diazinon Degradation in Submerged Soil and Rice-Paddy Water	244
13. Degradation of Chlorinated Hydrocarbons under Anaerobic Conditions	256
