

CONTENT

PART I. PRINCIPLES OF ADHESION IN BIOLOGICAL SYSTEMS

- | | | |
|----|---|----|
| 1. | A Biophysical Consideration of Cell Contact Phenomena | 1 |
| 2. | Surface Properties Influencing Biological Adhesion | 15 |

PART II. BIOLOGICAL ADHESIVES

- | | | |
|----|--|-----|
| 3. | Adhesion of Cells to Surfaces | 51 |
| 4. | Attachment of Marine Bacteria to Solid Surfaces | 74 |
| 5. | A Review of Some Factors Affecting Settlement and Adhesion in the Cyprids of Some Common Barnacles | 89 |
| 6. | Histochemistry of Barnacle Cyprid Adhesive Formation | 113 |
| 7. | Histological and Histoenzymological Characteristics of the Cement Apparatus in Barnacles | 123 |
| 8. | Composition of Mussel and Barnacle Deposits at the Attachment Interface | 139 |

PART III. ADHESIVES FOR SOFT TISSUE

- | | | |
|-----|---|-----|
| 9. | Chemical Mechanisms Suitable for Bonding Tissues | 153 |
| 10. | Compositions Producing Adhesion through Hydration | 163 |
| 11. | Hemostatic Applications of Alpha Cyanoacrylates: Bonding Mechanism and Physiological Degradation of Bonds | 185 |
| 12. | Butyl Cyanoacrylate as a Surface Adhesive in Human Oral Wounds | 202 |
| 13. | Review of Cyanoacrylate Monomers in Surgery | 210 |
| 14. | Adhesion to Skin Effects of Surgical Tapes on Skin | 215 |

PART IV. ADHESIVES FOR HARD TISSUES

- | | | |
|-----|---|-----|
| 15. | Bonding to Hard Dental Tissues | 225 |
| 16. | Polyurethanes | 255 |
| 17. | Surface Preparation and Various Adhesive Resins | 269 |
