

CONTENTS

UNIT ONE . PROBLEMS AND CHARACTERISTICS OF LIVING THINGS	
1. THE CHANGING POPULATION OF LIVING THINGS	17
2. CHARACTERISTICS OF ALL LIVING THINGS	39
UNIT TWO . USING OUR BIOLOGICAL RESOURCES WISELY	
3. CONSERVATION OF THE SOIL	64
4. CONSERVATION OF NEEDED MATERIALS IN THE SOIL	84
5. CONSERVATION OF FORESTS	103
6. CONSERVATION OF WILD LIFE	117
UNIT THREE . THE WORLD’S FOOD SUPPLY	
7. THE MANUFACTURE OF FOOD	146
8. CONTROLLING THE MANUFACTURE OF FOOD	170
UNIT FOUR . FOOD AND LIFE	
9. FOODS AND DIET	197
10. HOW FOOD IS USED BY LIVING THINGS	227
UNIT FIVE . THE CONQUEST OF DISEASE	
11. ENEMIES TO HEALTH	227
12. HUMAN CONSERVATION THROUGH EFFORTS TO MAINTAIN HEALTH	303
UNIT SIX . THE BEHAVIORS OF LIVING THINGS	
13. THE NATURE OF BEHAVIOR TAKE PLACE	355
14. HOW BEHAVIORS TAKE PLACE	375
15. CHANGING AND CONTROLLING BEHAVIORS FOR SUCCESSFUL LIVING	409
UNIT SEVEN . LIFE CONTINUES FROM AGE TO AGE	
16. TYPES OF REPRODUCTION	428
17. LIFE-PAST, PRESENT, AND FUTURE	465
UNIT EIGHT . KENDS OF LIFE	
18. THE INVERTEBRATES, OR ANIMALS WITHOUT BACKBONES	513
19. THE HIGHEST GROUP OF LIVING THINGS	537
20. THE FOUR GREAT GROUPS THAT MAKE UP THE PLANT KINGDOM	554
AS SCIENTISTS WORK: ELEMENTS OF SCIENTIFIC METHOD	570
AS SCIENTISTS THINK: SCIENTIFIC ATTITUDES	571
GLOSSARY	573
INDEX	591
