

CONTENT

1. HEREDITY AND THE CONTINUITY OF LIFE	1
2. HEREDITY AND ENVIRONMENT	17
3. MENDEL'S LAW OF SEGREGATION	32
4. SEGREGATION OF GENES AND CHROMOSOMES	45
5. SIMPLE MENDELIAN TRAITS IN MAN	59
6. MENDEL'S PRINCIPLE OF INDEPENDENT ASSORTMENT	71
7. THE EXPRESSION AND INTERACTION OF GENES	85
8. MULTIPLE-FACTOR INHERITANCE	99
9. ALLELISM AND PLEIOTROPISM	112
10. LETHAL GENES, PENETRANCE, AND EXPRESSIVITY	125
11. THE NATURE-NURTURE PROBLEM IN MAN: TWIN STUDIES	133
12. SEX-LINKED INHERITANCE	143
13. LINKAGE AND CROSSING OVER	160
14. GENETIC MAPS OF CHROMOSOMES	181
15. CHROMOSOME ABERRATIONS AND CYTOLOGICAL MAPS	195
16. SPONTANEOUS MUTATION	214
17. INDUCED MUTATION	231
18. GENES IN POPULATIONS	241
19. CROSSING, SELFING, INBREEDING, AND HETEROSIS	254
20. GENETICS OF RACE FORMATION	270
21. GENETICS OF SPECIES FORMATION	286
22. DETERMINATION OF SEX	303
23. VARIETIES OF SEXUAL REPRODUCTION	314
24. PHYSIOLOGICAL GENETICS	326
25. THE GENIC CONTROL OF DEVELOPMENT	339
26. CYTOPLASM IN HEREDITY AND DEVELOPMENT	359
27. THE ELEMENTS OF THE GENETIC SYSTEM	370
28. ORGANIZATION OF THE GENETIC MATERIAL	379
29. STATISTICAL INFERENCE IN GENETICS	388
APPENDIX EXPERIMENTS IN PLANT HYBRIDIZATION	419
BIBLIOGRAPHY	444
INDEX	449
