

CONTENTS

The Identification of Certain Pseudomonas Species	1
Methods of Identification in the Genus Xanthomonas	9
Identification Methods applied to Chromobacterium	15
Biochemical Identification of Enterobacteriaceae	21
Techniques in the Identification and Classification of Bruucella	35
Methods for the Characterization of the Bacteroidaceae	51
Methods for Classifying Staphylococci and Micrococci	59
Identification of the Lactic Acid Bacteria	65
Colonial Morphology and Fluorescent Labelled Antibody Staining in the Identification of Species Of the Genus Clostridium	81
The Identification of Certain Mycobacterium Species	97
An Alternative Approach to the Identification of Streptomyces Species: a Working System	103
Rapid and Simple Biochemical Tests for Bacterial Identification	111
A Multi-point Inoculation Method for Performing Biochemical Tests on Bacteria	117
An Automatic Multi-point Inoculator for Petri Dishes	125
Author Index	137
Subject Index	141
