

CONTENTS

PART I Pathogenic organisms in foods	
Common Food-Poisoning Bacteria	3
Indicator Organisms	23
The Importance of Detection	32
References	37
PART II A selection of methods for the microbiological examination of foods	
Principles and Problems of Selection	49
Sampling Procedures	52
Recommended Methods for Microbiological Examination	59
References	142
PART III Specifications for media, reagents, and ingredients	
Specifications for ingredients for media and reagents	151
Specifications for media	156
Specifications for Diagnostic Reagents	203
References	207
APPENDICES	
I Agreed programme of the Iams International Committee on Microbiological Specifications for Foods	213
II Members of the Iams International Committee on Microbiological Specifications for Foods	215
III Subscribers to the sustaining fund of the Iams International Committee on Microbiological Specifications for Foods	218
IV Some recommendations on safety precautions in the microbiological laboratory	219
V Some additional considerations in sampling	221
Index	227
