LIST OF CONTRIBUTORS	v
PREFACE	ix
The Investigation of Food Poisoning Outbreaks in England and Wales	1
J. A. PINEGAR AND ANN SUFFIELD	
The Investigation of Food Poisoning Outbreaks	1
Bacteriological Laboratory Methods	9
Statistics of Food Poisoning in England and Wales 1970-1979	15
Intrinsic Food Poisoning	17
Outbreaks of Food Poisoning	19
References	21
Bacterioscopic Examination of Specimens Possibly Involved in Diseases of Bacterial Etiology Transmitted by Foods	25
SIMONE A. BOUWER-HERTZBERGER AND D. A. A. MOSSEL	
Application in Practice	28
Further Investigations	29
References	31
The Standard Salmonella Isolation Method	35
F. M. VAN LEUSDEN, M. VAN SCHOTHORST AND H. J. BECKERS	
Development of the Method	35
The Standard Method in Practice	37
Discussion	42
Appendix	45
References	48
Salmonella Isolation and Identification Techniques Alternative to the Standard Method	51
R. W. S. HARVEY AND T. H. PRICE	
Salmonella Isolation Techniques	51
Identification	65
Appendix	67
References	71

Rapid Detection of Salmonellas in Foods, Feeds and Animal Slurries by a Modified Fluorescent-antibody Technique .	73
J. F. EARLY AND J. T. PATTERSON	
Methods .	74
Staining .	74
Results and Discussion .	75
References .	75
The Detection of Salmonellas in Foods and Environmental Samples by a Semi-automatic Method .	77
R. A. E. BARRELL AND A. M. PATON	
Materials and Methods .	77
Results and Discussion .	79
References .	81
A Method for Enumerating Salmonellas from Environments in the Poultry Industry .	83
SUSAN C. MORGAN-JONES	
Methods .	84
Discussion .	89
Appendix .	89
References .	90
A Method for the Enumeration of Salmonellas in Sewage and Sewage Sludge .	91
D. C. WATSON	
Principles of Method. .	93
Isolation of Salmonellas .	94
Appendix .	95
References .	96
Isolation and Enumeration of <i>Clostridium perfringens</i> .	99
G. C. MEAD, B. W. ADAMS, T. A. ROBERTS AND J. L. SMART	
Direct Plating Methods .	100
Simplified Counting Methods .	101
Enriching Small Numbers of <i>Cl. perfringens</i> .	102
Confirmatory Tests .	103
Examination of Foods and Faeces Associated with Food Poisoning .	105
Appendix .	106
References .	108

<i>Clostridium perfringens</i> Type A: Serological Typing and Methods for the Detection of Enterotoxin	111
M. F. STRINGER, G. N. WATSON AND R. J. GILBERT	
Serological Typing	111
Enterotoxin	121
Serological Detection Methods	124
Appendix	131
References	132
A Liquid Medium for the Enumeration of <i>Clostridium perfringens</i> in Food and Faeces	137
H. BEERENS, Ch. ROMOND, C. LEPAGE AND J. CRIQUELION	
Materials and Method	137
Results and Discussion	139
Conclusions	148
References	149
Detection and Isolation of <i>Clostridium botulinum</i>	151
G. HOBBS, J. S. CROWTHER, P. NEAVES, P. A. GIBBS AND B. JARVIS	
Properties of the Organisms	153
Properties of the Toxins	154
Treatment of Sample for Toxin Testing	155
Characterization of Toxin	157
Isolation and Identification of <i>Cl. botulinum</i>	159
Appendix	162
References	162
Quantitative Isolation and Identification of <i>Staphylococcus aureus</i>	165
SIMONE A. BOUWER-HERTZBERGER, D. A. A. MOSSEL AND P. G. H. BIJKER	
Media	166
Plating and Incubation Procedure	168
Identification	168
Appendix	169
References	170

The Use of Phage Typing in the Investigation of Food Poisoning Caused by <i>Staphylococcus aureus</i> Enterotoxins . . .	173
MAUREEN DE SAXE, A. W. COE AND ANTONNETTE A. WIENEKE	
Development of the Method . . .	174
Technical Methods . . .	178
Appendix 1 . . .	191
Appendix 2 . . .	192
Appendix 3 . . .	194
Appendix 4 . . .	195
References . . .	196
Detection of Staphylococcal Enterotoxins(SE) with Special Reference to the Enzyme Linked Immunosorbent Assay (ELISA) . . .	199
S. NOTERMANS	
ELISA Methods . . .	200
Production of Reagents to be Used in ELISA . . .	202
ELISA Procedures . . .	204
Discussion . . .	206
References . . .	208
Optimal Sensitivity Plate Method for the Detection of Staphylococcal Enterotoxins . . .	211
J. HARVEY AND J. T. PATTERSON	
Methods . . .	212
Applications . . .	213
References	215
The Detection of <i>Escherichia coli</i> in Foods . . .	217
J. S. ABBISS AND RUTH M. BLOOD	
Traditional Methods . . .	217
Accelerated Detection . . .	220
Recovery of Atypical Strains . . .*	220
Demonstration of Potentially Diarrhoeaogenic Strains . . .	222
Recovery of Stressed <i>Escherichia coli</i> . . .	222
Conclusions . . .	223
References . . .	223
<i>Escherichia coli</i> : Detection of Enterotoxins . . .	227
MARGARET A. LINGGOOD	
Methods for Assaying Enterotoxins . . .	229
Appendix . . .	233
References . . .	236

The Rapid Enumeration of <i>Escherichia coli</i> in Foods by Using a Direct Plating Method	239
R. HOLBROOK AND JUDITH M. ANDERSON	
Rationale of the Method	239
Evaluation of the Direct Plating Method	246
Conclusions	249
Appendix	250
References	252
Quantitative Isolation and Identification of <i>Bacillus cereus</i>	255
SIMONE A. BOUWER-HERTZBERGER AND D. A. A. MOSSEL	
Media	256
Identification	257
Appendix	257
References	258
Identification and Characterization of <i>Bacillus cereus</i> and Other <i>Bacillus</i> Species Associated with Foods and Food Poisoning	261
J. M. KRAMER, P. C. B. TURNBULL, G. MUNSHI AND R. J. GILBERT	
Characteristics of the Genus <i>Bacillus</i>	261
Identification of Common Foodborne <i>Bacillus</i> Species	264
<i>Bacillus cereus</i> Food Poisoning	266
Other <i>Bacillus</i> spp. as Possible Food Poisoning Agents	280
Appendix	282
References	283
The Isolation and Identification of <i>Vibrio parahaemolyticus</i>	287
J. A. TAYLOR, D. C. MILLER, G. I. BARROW, D. C. CANN AND LESLEY Y. TAYLOR	
Isolation	288
Identification	291
Pathogenicity	294
Epidemiology	295
Appendix	297
References	298
Some Methods for the Isolation and Identification of <i>Yersinia enterocolitica</i> and Related Organisms from Foods	303
JANE P. SUTHERLAND AND A. H. VARNAM	
Approaches to the Selective Isolation of <i>Yersinia enterocolitica</i>	304
Evaluation of Media and Approaches	307
Appendix	310
References	311

Isolation, Cultivation and Identification of <i>Campylobacter jejuni</i> and <i>C. coli</i>	313
M. B. SKIRROW, J. BENJAMIN, M. H. H. RAZI AND SALLY WATERMAN	
Classification and Nomenclature	315
General Growth Conditions	315
Primary Isolation	319
Identification	320
Appendix	324
References	326
Fungi Producing Trichothecenes	329
C. BOOTH	
Species Producing Trichothecenes	330
Isolation of the Fungi	333
Appendix	335
References	342
Mycotoxigenic Fungi: <i>Penicillium</i> and <i>Aspergillus</i>	343
AGNES H. S. ONIONS	
<i>Aspergillus</i>	343
<i>Penicillium</i>	355
References	364
Methods for the Detection and Identification of Selected Mycotoxins	367
B. JARVIS, W. B. CHAPMAN, A. P. WILLIAMS, DEIDRE M. NORTON AND GILLIAN M. TOULE	
Development of Analytical Procedures	370
Procedures for Extraction and 'Clean-up' of Mycotoxins	372
Chemical Assay Procedures	373
Biological Assay Procedures	378
Conclusion	383
Appendix 1	385
Appendix 2	386
Appendix 3	389
Appendix 4	390
References	390
SUBJECT INDEX	393
