

## CONTENT

1 FOOD AND MICROORGANISMS	
1 Food as a Substrate for Microorganisms	3
2 Microorganisms Important in Food Microbiology	17
3 Contamination of Foods	65
4 General Principles Underlying Spoilage: Chemical Changes Caused by Microorganisms	77
2 PRINCIPLES OF FOOD PRESERVATION	
5 General Principles of Food Preservation: Asepsis Removal, Anaerobic Conditions	93
6 Preservation by Use of High Temperatures	101
7 Preservation by Use of Low Temperatures	130
8 Preservation by Drying	143
9 Preservation by Food Additives	154
3 CONTAMINATION, PRESERVATION, AND SPOILAGE OF DIFFERENT KINDS OF FOODS	
10 Contamination, Preservation, and Spoilage of Cereals and Cereal Products	173
11 Contamination, Preservation, and Spoilage of Sugars and Sugar Products	185
12 Contamination, Preservation, and Spoilage of Vegetables and Fruits	194
13 Contamination, Preservation, and Spoilage of Meats and Meat Products	218
14 Contamination, Preservation, and Spoilage of Fish and Other Seafoods	243
15 Contamination, Preservation, and Spoilage of Eggs	256
16 Contamination, Preservation, and Spoilage of Poultry	270
17 Contamination, Preservation, and Spoilage of Milk and Milk Products	278
18 Spoilage of Heated Canned Foods	306
19 Miscellaneous Foods	319
4 FOODS AND ENZYMES PRODUCED BY MICROORGANISMS	
20 Production of Cultures for Food Fermentations	331
21 Food Fermentations	341
22 Foods and Enzymes from Microorganisms	398
5 FOODS IN RELATION TO DISEASE	
23 Food-borne Infections and Intoxications: Bacterial	419
24 Food-borne Poisonings, Infections, and Intoxications: Nonbacterial	454
25 Investigation of Food-borne Disease Outbreaks	473
6 FOOD SANITATION, CONTROL, AND INSPECTION	
26 Microbiology in Food Plant Sanitation	487
27 Food Control	502
Appendix	513
Index	517
