

CONTENTS

1. Introduction	6
1.1 The Basic Concepts of Genomics	6
1.2 The Role of Emerging Technologies	7
2. The Conduct of the Study	10
3. Key Issues in the Development of DNA Analysis for Human Health	12
3.1 Definition of Post-Genomics	12
3.2 Implications for Human Health	12
3.3 Scientific and Technological Inputs	13
3.4 The Integration of Post-Genomic Research into the Healthcare System	14
3.5 Funding, Infrastructure and Resources	15
3.6 Education and Training	15
3.7 Collaboration and Networking	16
3.8 Commercialization	16
3.9 Societal Implications of the Post-Genomic Era	17
3.10 Implications for Small and Less-Developed Economies	17
4. Survey of Genomic Experts in APEC Member Economies	18
5. Scenario-Based Futures	20
6. Policy Initiatives for the future of Post-Genomics in the APEC Region	25
7. Conclusions and Further Thoughts	27
Appendix 1: List of Contributors	30
Appendix 2: Key Themes-APEC Life Sciences Innovation Forum	35
