INTRODUCTION	V
PREFACE A	VII
PREFACE B	XI
PART I-SOCIAL IMPACT	
1. Viruses in Water	3
2. Water Needs and Usage	12
3. The Legislative Concern for Research on Viruses in Waste and Potable Water	27
PART II-EPIDEMIOLOGY	
4. Human-Associated Viruses in Water	39
5. Animal-Associated Viruses in Water	50
6. The Minimal Infective Dose	61
7. Epidemiological Indicators for Transmission of Viruses in Water	70
PART III-DETECTION METHODOLOGY	
8. Methods for Detecting Enteric Viruses in Water and Wastewater	89
9. Viruses on Solids in Water	128
10. Systems for Detecting Viruses and Viral Activity	139
11. Virologic and Engineering Problems in Monitoring Viruses in Water	152
PART IV-RECLAMATION AND DISPOSAL	
12. REMOVAL OF VIRUSES BY TREATMENT PROCESSES	167
13. PHOTODYNAMIC INACTIVATION OF VIRUSES AND BACTERIA IN SEWAGE EFFLUENTS	180
14. Viruses in Renovated Waters	189
15. Disposal of Sludges	196
PART V-LEGAL, COMMUNITY AND GEOGRAPHIC PROBLEMS	
16. Legal and Regulatory Decisions and Dilemmas	209
17. An Example of Sewage Disposal by Spray Irrigation	218
18. Geographic Considerations in Virus Removal in the Americas	221
19. Geographic Considerations in Virus Removal in Asia	236
PART VI-PERSPECTIVES: AN APPRAISAL OF NEED	
Social Impact	249
Detection Methodology	251
Epidemiology	252
Reclamation and Disposal	253
Legal, Community, and Geographic Problems	256
