

CONTENTS

INTRODUCTION. Types of Micro-organisms: Their Special Characteristics and Habitats	1
SECTION I. Morphology and Life-cycles of Micro-organisms	
Chapter 1. Bacteria	6
Chapter 2. Fungi	57
Chapter 3. Protozoa and slime Moulds	87
Chapter 4. Algae	106
Chapter 5. Viruses	118
SECTION II. Physiology and Metabolism of Micro-organisms	
Chapter 6. Chemistry of Micro-organisms	149
Chapter 7. Metabolism	177
Chapter 8. Nutrition	212
Chapter 9. Growth	226
Chapter 10. Phase Changes, Differentiation and Reproduction	243
Chapter 11. Survival, Dormancy, Senescence and Death	255
SECTION III. Ecology of Micro-organisms	
Chapter 12. Microbiology of Soil	267
Chapter 13. Microbiology of Air and Water	286
Chapter 14. Micro-organisms and Plants	310
Chapter 15. Micro-organisms and Animals	331
Chapter 16. Microbiology of Food and other Commercial Products	367
Chapter 17. Industrial Fermentations	397
APPENDIX Some Techniques used in the study of Micro-organisms	407
INDEX	427
