Supplements Overview	xxiv
PROLOGUE: Discovering the Microbial World	1
PART I AN OVERVIEW OF MICROBIOLOGY	21
1 Essential Biochemistry for Microbiology	22
2 The Scope of Microbiology	56
3 Characterization of Microorganisms	80
4 Prokaryotic and Eukaryotic Cell Structures	106
PART II NUTRITION AND CULTIVATION OF MICROORGANISMS	153
5 Nutritional Requirements and Microbiological Media	154
6 Cultivation and Growth of Microorganisms	175
PART III CONTROL OF MICROORGANISMS	199
7 Control of Microorganisms: Principles and Physical Agents	200
8 Control of Microorganisms: Chemical Agents	221
PART IV MAJOR GROUPS OF MICROORGANISMS	241
9 The Major Groups of Prokaryotic Microorganisms: Bacteria	242
10 The Major Groups of Eukaryotic Microorganisms: Fungi, Algae and Protozoa	271
PART V MICROBIAL METABOLISM	303
11 Microbial Metabolism: Energy-Yielding Biochemical Processes	304
12 Microbial Metabolism: Energy-Requiring Biochemical Processes	328
PART VI MICROBIAL GENETICS	349
13 Inheritance and Variability	350
14 Microbes and Genetic Engineering	380
PART VII VIRUSES	401
15 Viruses: Morphology, Classification, Replication	402
16 Viruses: Cultivation Methods, Pathogenicity	436
PART VIII MICROORGANISMS AND DISEASE: RESISTANCE TO INFECTION	453
17 Normal Flora of the Human Body	454
18 Host-Parasite Interactions: Nonspecific Host Resistance	475
19 The Immune Response: Specific Host Resistance	500
20 Practical Aspects of Immunity	527
21 Antibiotics and Other Chemotherapeutic Agents	556
PART IX MICROORGANISMS AND DISEASE: MICROBIAL DISEASES	589
22 Nosocomial Infections	590
23 Sexually Transmitted Diseases	646
24 Airborne and Waterborne Diseases	680

25 Foodborne and Waterborne Diseases	680
26 Arthropod-Borne Diseases	715
27 Wound and Skin Infections Acquired by Direct Contact	743
PART X MICROBIAL ECOLOGY	771
28 Microbiology of the Soil and the Atmosphere	772
29 Microbiology of Natural Waters, Drinking Water, and Wastewater	806
PART XI INDUSTRIAL MICROBIOLOGY	841
30 Microbiology of Food	842
31 Biotechnology: The Industrial Applications of Microbiology	869
APPENDIXES	
A Answers to the Review Guides A.3	
B Differentiating Bacterial Species by Biochemical Tests A.7	
C Use of Exponential Notation and Logarithms in Microbiology A.8	
D Restriction Endonucleases A.9	
Further Reading R.1	
Credits C.1	
Glossary G.1	
Indexes	
Name Index 1.1	
Organism Index 1.2	
Subject Index 1.5
