

contents

	preface	
1	introduction to microbiology	
1	The Scope of Microbiology	3
2	The Evolution of Microbiology	16
3	Microbial Nomenclature and Classification	33
4	The Microscopic Observation of Microorganisms	40
2	characteristics of bacteria	
5	The Anatomy of Bacteria	57
6	The Cultivation of Bacteria	79
7	Reproduction and Growth	91
8	Pure Cultures and Growth Characteristics	105
9	Enzymes	114
10	Bacterial Metabolism	128
11	Modifications, Mutations, and Genetics	149
12	The Orders of Bacteria	166
3	microorganisms other than bacteria	
13	Fungi: The Molds	189
14	Fungi: The Yeasts	207
15	The Viruses	221
16	The Rickettsiae	245
17	The Protozoa	256
18	The Algae	269
4	control of microorganisms	
19	Control of Microorganisms	289
20	Control by Physical Conditions	298
21	Killing and Inhibiting by Chemical Agents	312
22	Antibiotics and Other Chemotherapeutic Agents	328
5	microorganisms and disease	
23	Pathogens, Virulence, and Infection	357
24	Resistance and Immunity	368
25	Scrological and Diagnostic Methods	382
26	Air-borne Infections of Man	401

- 27 Food- and Water-borne Infections of Man 426
- 28 Contact Diseases of Man 441
- 29 Infectious Diseases of Animals 466
- 30 Infectious Diseases of Plants 478

6 applied microbiology

- 31 Microbiology of Water 495
- 32 Microbiology of Sewage 511
- 33 Microbiology of Air 523
- 34 Microbiology of Milk 532
- 35 Microbiology of Foods 550
- 36 Microbiology of Soil 561
- 37 Industrial Microbiology 575

appendices

- A. Outline Classifications of Microorganisms 595
- B. Characteristics of Selected Genera of Microorganisms 613
- C. Glossary 637

index 649
