

CONTENTS

Foreword	
Table of Contents	
Introduction	1
TRAINING FOR CAREERS IN MICROBIOLOGY	
Introduction	3
Training for a Career in Industrial Microbiology: Academic Viewpoint	5
Training for a Career in Industrial Microbiology: Industrial Viewpoint	8
SPACE AGE MICROBIOLOGY	
Introduction	13
Gnotobiotics in Relation to Space Biology	15
Adaptation of Microorganisms to Radiation	21
Algae and Submarine Habitability	26
Studies on Algal Gas Exchangers with Reference to Space Flight	33
The Microbiological Challenge in Space	45
SELF-SANITIZING AGENTS FOR FABRICS	
Introduction	57
Problems in the Selection, Testing, and Formulation of Antibacterial to be Used as Textile Additives	59
Factors Involved in Testing Products Carrying Residual Germicidal Chemicals	65
The merchant Looks at Microbiology	74
ANTITUMOR ANTIBIOTICS	
Introduction	79
Problems in Detection and Isolation of Antitumor Antibiotics	81
The Cancer Chemotherapy National Service Center(CCNXC) Antitumor Testing Program for Antibiotics	86
Mechanisms of Action of Anticancer Antibiotics	91
Screening of Antineoplastic Agents with <i>Neurospora crassa</i>	101
HALLUCINOGENIC FUNGI	
Methods for the Production of Certain Hallucinogenic Agarics	109
Some Biochemical and Physiological Correlations Developed from Clinical Observations with Various Toxic Mushrooms and Medicinal products	110
DETERIORATION OF PROTEINS	
Introduction	121
Proteolysis in Microbial Proteinases	125
Microbial Deterioration of Skin Proteins	125
Some Aspects of Protein Degradation in Leather Processing	137

DETERIORATION OF WOOD BY LOWER FUNGI

Introduction	147
Deterioration of Wood by Terrestrial Ascomycetes And Fungi Imperfecti	148
Cellulolytic Activity of Lignicolous Marine Ascomycetes and Deuteromycetes	157

FUNGAL METABOLISM AND FUNGICIDES

Introduction	169
Gluconolactone as an Inhibitor of Carbohydrases	171
Effect of Cycloheximide (Actidione) on Metabolism and Growth of Gungi	181
Effect of Elemental Sulfur, Dithiocarbamates, and related Fungicides on Organic Acid Metabolism of Fungus Spores	187

VARIATION IN MICROORGANISMS

Introduction What is Microbial Variation?	207
Variations in <i>Neurospora crassa</i>	211
Physiological and Cultural Variation of Genetic Origin in Yeasts	221
Modification of radiation Effects in Bacteria	222
The Mechanism of Chemical Mutagenesis with Special Reference to Triethylene Melamine Action	231

CONTRIBUTED PAPERS

Coagulase Activity of Bovine Clinical Isolates and Phage Propagating Strains of <i>Staphylococcus</i>	243
Treatment of Spontaneous Ringworm in Mice with Griseofulvin	245
The Decomposition of Cellulose of Cotton Fibers by Fungi of the Genus <i>Aspergillus</i>	248
A Technique for the Direct Estimation of Bacteria in Oil Field Waters	253

PRESIDENTIAL ADDRESS

The Past and Future of the Society for Industrial Microbiology	261
--	-----
