

**CONTENTS**

1 General Survey: Up the Magnification Scale	1
2 General Optical Principles: The Compound Microscope	50
3 Apparatus	92
4 Photomicrography by Reflected illumination	158
5 Low Power Photomicrography (Photomicrography)	220
6 Use of the Compound Microscope in Photomicrography	239
7 Illumination (Optics and Photometry)	292
8 Lamps	342
9 Quality of Illumina	366
10 Image Contrast	431
11 Eyepiece and Roll Film Cameras	461
Appendices	
1 Depth of Field in Photomicrography	488
2 Determination of Equivalent Focal length and Location of Gauss Points of a Lens	505
3 Low Power Photomicrography by Transmitted Illumination	510
Equations	521
Index	I-I
