

CONTENTS

12 Special Methods of Illumination	527
13 Flash Photomicrography	591
14 Use of the whole Photographic Spectrum	636
15 Photographic Principles	687
16 Selection of Photomicrographic Materials	734
17 Determination of Exposure	769
18 Processing and Printing	821
19 Special Problems and Advantages in Color Photomicrography	839
20 Fluorescence Micrography	899
21 Cinemicrography	935
Appendices	
4 A. Image Illuminance and Photographic Exposure Formulas	992
B. Guide Number Formula for Flash Photomicrography	995
5 Preparation of Special Immersion Oils	1002
A. Aqueous, homogeneous with Glass	1002
B. Immersion Fluids for the Near Ultraviolet	1002
C. Hydrophobic Immersion Oil for Quartz Monochromatic Objectives	1008
6 A. Repetitive Spark Illuminator for the Far-Ultraviolet	1012
Bibliography	1020
Equations	1033
Index	I-I
