

CONTENTS

PART I

GENERAL PRINCIPLES AND METHODS

CHAPTER	3
I. INTRODUCTION	3
II. COLLECTING AND SUBDIVIDING PLANT MATERIALS FOR PROCESSING	5
III. KILLING, FIXING, AND STORING PLANT TISSUES	13
IV. DEHYDRATION FOR EMBEDDING	23
V. INFILTRATION AND EMBEDDING IN PARAFFIN	32
VI. MICROTOME SECTIONING OF MATERIAL IN PARAFFIN	40
VII. STAINING PARAFFIN SECTIONS	55
VIII. INFILTRATION AND EMBEDDING IN CELLOIDIN	79
IX. SECTIONING AND STAINING MATERIAL EMBEDDED IN CELLOIDIN	88
X. SECTIONING UNEMBEDDED TISSUES	94
XI. THE PREPARATION OF WHOLE MOUNTS	103
XII. CRITERIA OF SUCCESSFUL PROCESSING	113

PART II

SPECIFIC METHODS

XIII. INTRODUCTION	123
XIV. VEGETATIVE ORGANS OF VASCULAR PLANTS	126
XV. THALLOPHYTA	148
XVI. BRYOPHYTA	161
XVII. PTERIDOPHYTA. REPRODUCTIVE STRUCTURES	164
XVIII. SPERMATOPHYTES. REPRODUCTIVE STRUCTURES	168
XIX. THE CONSTRUCTION, USE, AND CARE OF THE MICROSCOPE	178
XX. PHOTOMICROGRAPHY	199
INDEX	217
