

CONTENTS

	Page
Part One :THE MICROSCOPE	
1. Elementary optical considerations	3
2. Optical considerations (continued)	23
3. The standard microscope : its component parts	38
4. Selecting the right equipment	43
5. Illumination	70
6. The microscope in use	91
7. Some special instruments and applications	118
8. Measurements and counts	167
Part Two : PHOTOMICROGRAPHY	
9. The Projected image	183
10. Colour filters; Illumination	196
11. Exposure estimation	216
12. The monochrome process	227
13. Photomicrography on reversal colour materials	232
Appendix I Useful data for the microscopist	242
Appendix II Test Slides	243
Appendix III Societies and Clubs	245
Index	247
