

## CONTENTS

PART I. THE DIAZOTROPHS	1
CHAPTER 1 RECOGNITION	3
I. HISTORICAL ROOTS	3
II. DETECTION OF DIAZOTROPHS AND NITROGENASE	7
CHAPTER 2 DESCRIPTION AND CLASSIFICATION OF DIAZOTROPHS	14
I. FREE-LIVING DIAZOTROPHS	18
II. OBLIGATORY SMBIOSES	28
CHAPTER 3 PERSPECTIVES	39
I. EVOLUTION	39
II. ROLE OF DIAZOTROPHS IN GLOBAL NITROGEN ECONOMY	43
PART II. BIOCHEMISTRY AND BIOPHYSICS	
CHAPTER 4 AN EQUATION FOR THE NITROGENASE REACTION	65
I. THE CLOSTRIDIUM-PYRUVATE N <sub>2</sub> -FIXING SYSTEM	66
II. ATP	67
III. AZOTOBACTER NITROGENASE AND DITHIONITE	69
IV. H <sub>2</sub> EVOLUTION AND ATP HYDROLYSIS: NITROGENASE ACTIVITY WITHOUT N <sub>2</sub>	70
V. ALTERNATE SUBSTRATES FOR NITROGENASE	71
VI. H <sub>2</sub> N <sub>2</sub> HYDROGENASE AND NITROGENASE – A SPECIAL RELATIONSHIP?	72
CHAPTER 5 NITROGENASE: THE CATALYST	74
I. PROCUREMENT	74
II. PROPERTIES OF MO-Fe PROTEIN AND Fe PROTEIN	82
III. PROPERTIES OF NITROGENASE	98
CHAPTER 6 NITROGENASE: THE CATALYSIS	106
I. NITROGENASE TURNOVER	106
II. SUBSTRATE REDUCTION	121
CHAPTER 7 MECHANISM	133
I. A MODEL FOR THE FORMATION OF CATALYTICALLY ACTIVE SPECIES	133
II. REDUCIBLE SUBSTRATE COMPLEXATION AND REDUCTION	142
CHAPTER 8 CELLULAR ACCOMMODATION OF NITROGENASE	151
I. LOCALIZATION OF NITROGENASE	151
II. ELECTRON-DONATING SYSTEMS	152
III. AMMONIA ASSIMILATION	159
IV. OTHER ENZYMES AND PROTEINS ASSOCIATED WITH N <sub>2</sub> FIXATION	160
