

CONTENTS

CHAPTER I

Amino Acid Sequence Analysis of Proteins

I. Introduction	1
II. Purification of Proteins	2
III. Amino and Carboxy Terminal Analysis	3
IV. Determination of Amino Acid Composition	8
V. Fragmentation of Proteins	12
VI. Separation of Peptides	16
VII. Sequence Determination	18
VIII. Reconstruction the Primary Sequence	22
IX. Plant Protein Sequence Data	23
X. Conclusion	25
Acknowledgement	26
References	26

CHAPTER 2

Immunochemical Investigations of Plant Proteins

I. Introduction	31
II. Immunochemical Methods	32
III. Application of Immunochemical Methods in Plant Protein Studies	48
IV. Conclusion	62
Acknowledgements	62
References	62

CHAPTER 3

Properties of an physiological Changes in Storage Proteins

I. Introduction	71
II. General Properties of Storage Proteins	72
III. Cereal Proteins	73
IV. Potato Tuber Proteins	74
References	87

CHAPTER 4

The Proteins of Barley

I. The Pioneer Work of Osborne	89
II. Factors Influencing the Yield of Protein Extracted	91
III. Solubilization and Subfractionation of the Glutelin Fraction	100
Acknowledgements	109
References	109

CHAPTER 5

Mechanism of Protein Synthesis in Higher Plants

I. Introduction	113
II. Ribosome	114
III. Mechanism of Protein Synthesis	115
IV. tRNA and Aminoacyl-tRNA Synthetase	119
V. Products of Cytoplasmic Protein Synthesis	121
VI. Protein Synthesis in Plant Cell Organelles and Their Relation to Cytoplasmic Protein Synthesis	122
VII. Products of Organellar Protein Synthesis	128
Acknowledgements	131
References	131

CHAPTER 6

The Biogenesis of Plant Mitochondria

I. Introduction	137
II. Replication of Mitochondria and Limitations of Mitochondrial Autonomy	138
III. Mitochondrial Protein-synthesizing Machinery	142
IV. Protein Synthesis by Isolated Mitochondria	149
V. The Products of Mitochondria	158
VII. Conclusions and Perspectives	162
References	162

CHAPTER 7

The Biogenesis of Chloroplasts

I. Introduction	167
II. Plastid DNA Basis of Genetic Information	173
III. Elements of Information Transformation	176
IV. Proteins Basis of Chloroplast Function	193
V. Regulatory Aspects of Chloroplast Biogenesis	201
References	205

CHAPTER 8

Plant Proteins and Phenolics

I. Introduction	211
II. The Interaction Between Phenolics and Proteins	212
III. Difficulties caused by Phenolic Compounds during the Extraction of Plant Proteins, Enzymes and Organelles	226
IV. Phenolics and Proteins in the Resistance of Plants against Phytopathogens	247
VII. The Role of Phenolics and Proteins in the Formation of Humus	248
VIII. The Role of Phenolics and Proteins in the Formation of Hazes in Beverages	251
IX. The Interactions of Polyphenols with Proteins and Taste and Flavour in Foods	254
X. Conclusion	255

Acknowledgements	256
References	256

CHAPTER 9

Protein Sweeteners

I. Introduction	265
II. A Macromolecular Taste Modifier	266
III. Micro-and Macromolecular Sweeteners	267
IV. The Serendipity Berry Sweetener	268
V. Protein Sweeteners from Katemfe	273
VI. The Probe Theory of Sweetness	277
VII. Glycosidic Sweeteners	279
VIII. Summary	279
References	279

CHAPTER 10

Proteins and Taxonomy

I. Taxonomy	281
II. Serology	283
III. Gel Electrophoretic Methods	289
IV. Taxonomic Studies in the Genus Brassica	293
V. Summary	296
References	296
Author Index	299
Subject Index	317
