

CONTENTS

I Properties and Biosynthesis of Plant Proteins	1
1 THE GENERAL PROPERTIES, CLASSIFICATION AND DISTRIBUTION OF PLANT PROTEINS	3
2 CHLOROPLAST PROTEINS AND THEIR SYNTHESIS	25
3 BIOSYNTHESIS OF LEGUME SEED PROTEINS	41
II DEVELOPMENT OF PROTEIN RESERVES IN SEEDS	57
4 DEVELOPMENT AND DEPOSITION OF PROTEIN IN OILSEEDS	59
5 THE MECHANISMS OF PROTEIN BODY DEPOSITION IN LEGUMES AND CEREALS	81
III UNDESIRABLE FACTORS ASSOCIATED WITH PLANT PROTEINS	107
6 NON-PROTEIN NITROGEN COMPOUNDS: TOXICITY AND ANTAGONISTIC ACTION IN RELATION TO AMINO ACID AND PROTEIN SYNTHESIS	109
7 PROTEASE INHIBITORS AND OTHER TOXIC FACTORS IN SEEDS	117
8 THE SIGNIFICANCE OF THE INTESTINAL MICROFLORA IN RELATION TO THE ORAL TOXICITY OF RAW NAVY BEANS AND JACK BEANS FOR JAPANESE QUAIL	
IV PRODUCTION OF PLANT PROTEINS	153
9 SOURCES OF PLANT PROTEINS-WORLD SUPPLY AND DEMAND	155
10 THE PRODUCTION OF LEAF PROTEIN CONCENTRATES FROM FORAGE CROPS	171
11 PROTEIN PRODUCTION BY MICRO-ORGANISMS	191
V IMPROVEMENT OF PLANT PROTEIN QUALITY AND YIELD	205
12 IMPROVING THE PROTEIN QUALITY OF CEREALS, GRAIN LEGUMES AND OILSEEDS BY BREEDING	207
13 FACTORS AFFECTING THE QUALITY AND YIELD OF SEED PROTEIN	227
VI NUTRITION ASPECTS	245
14 HUMAN PROTEIN REQUIREMENTS	247
VII PLANT PROTEINS IN THE FOOD INDUSTRY	265
15 PLANT PROTEIN FOOD MODELS IN INDUSTRY	267
16 FILAMENTS FROM PROTEINS	283
17 PHYSICAL PROPERTIES OF SEED GLOBULINS WITH REFERENCE TO MEAT ANALOGUE PRODUCTION	289
18 WHEAT PROTEINS-PHYSICAL PROPERTIES AND BAKING FUNCTION	299
19 FITTING PLANT PROTEIN RICH FOODS INTO PRESENT AND PROSPECTIVE FOOD LAWS	317
LIST OF PARTICIPANTS	329
INDEX	337
