CHAPTER 1
INTRODUCTION

Functions of Plant Parts	1
Inorganic Constituents Essential to Metabolism	2

CHAPTER 2
CARBOHYDRATES

Photosynthesis of Carbohydrates	5
Aldol Condensation	6
Nomenclature of Simple Sugars	7
Monosaccharides or Simple Sugars	10
Pentoses	10
Hexoses	14
Heptoses	17
Disaccharides	18
Pentose – hexose disaccharides	18
Methylpentose – hexose disaccharides	19
Dihexose – disaccharides	19
Non-reducing disaccharides	19
Reducing disaccharides	20
Trisaccharides	22
Tetrasaccharides	23
Polysaccharides	24
Pentosans	24
Hexosans	24
Mixed Polysaccharides	28
Pectins	30
Sugar Alcohols	36
Substituted Sugars	37
Chemistry of the Sugars	38
Oxidation Products of the Simple Sugars	39
Furfural Formation from Sugars	40
Labile Sugars	42
Mutarotation of Sugars	42
Methyl Glycosides	43
Synthesis of Sugars	43
Degradation of a Sugar	44

CHAPTER III

VEGETABLE FATS

General Discussion	45
Chemical Properties of Fats	49
Acid Value or Number	49
Saponification Value or Number	49
Chemical Properties of the Double Bond in Fatty Acids	50
Glycerol Formation	51
Composition of the Unsaponifiable Materials	52

CHAPTER IV

PLANT AND INSECT WAXES

General Discussion	53
Melting Points of N-Primary Acids and N-Primary Alcohols	55
Solubility of the Waxes	55
Biosyntheses of Plant and Insect Waxes	55
Physiological Significance of Waxes to Plants and Insects	62

Insect Waxes	62
Lac Wax	62
Chinese Insect Wax	62
Beeswax	63
Leaf Cuticle Waxes	63
Carnauba Wax	63
Fruit and Seed Coat Cuticle Waxes	63
Apple Cuticle Wax	63
Candelilla Wax	63
Leaf Waxes	63
Brussels Sprout Wax	66
Wax of Cactus	66
Wax of <i>Nicotiana tabacum</i>	66
Wax of Rose Petals	66
Wax of Cocksfoot	66
Wax of Rye Grass	66
Lucerne Wax	68
Wheat Wax	68

CHAPTER V PHYTOSTEROLS

General Discussion	69
Color Tests for Sterols	71
Lieberman-Burchard Test	71
Salkowski Test	71
Lifschuetz Test	71
Obermueller Test	71
Steinle-Kahlenberg Test	72
Montignie Test	72
O. Rosenheim Test	72
The Tortelli-Jeffe Test as Modified by Hielbron and Spring	72
Stereochemistry of the Cholane Rings	72
Sitosterol	75
Dihydrositosterol	75
Stigmasterol	76
Ergosterol	76
Phytosterolins or Sterol Glycosides	81
Synthetic	81
Naturally Occurring	82
Physiological Significance of Phytosterolins	82

CHAPTER VI PROTEINS

General Discussion	83
Classification	83
Protamines	84
Histones	84
Albumins	84
Globulins	84
Glutelins	84
Gliadins or Prolamins	84
Scleroproteins or Albuminoids	85
Conjugated Proteins	85
Nucleoproteins	85
Phosphoproteins	86
Carbohydraterproteins	86
Chromoproteins	86
Iodoproteins	87
Amino Acids in Proteins	87
Amino Acids Containing One Basic and One Acidic Group	87

Amino Acids in Which Acidic Groups Predominate	89
Amino Acids in Which Basic Groups Predominate	89
Amino Acids Containing Two Basic and Two Acidic Groups	89
Molecular Ratios and Fine Structures of the Amino Acids in Proteins	90
Nucleosides	94
Nucleotides	95
Nucleic Acids	96
Mononucleotides	96
Polynucleotides	96
Molecular Weight of Proteins	98
Structure of the Protein Molecule	101
Amino Acids	101
The Protein Molecule	106
Hydrolytic Products of Proteins	111
Meta-Proteins	112
Proteoses	112
Peptones	112
Peptides	112
Some Chemical Properties of Proteins	112
Color Reactions	112
Isoelectric Point of Proteins	113

CHAPTER VII ALKALOIDS

General Discussion	115
The Chemistry of Organic Hydroxides	115
The Chemistry of Nitrogen in Alkaloids	116
Other Chemical Groups Found in Alkaloids	116
An Alkaloid Defined – A Discussion	116
Classification of Alkaloids	117
The Methylation of Nitrogen Occurring in a Cycle	120
A Plausible Theory for the Formation of the Isoquinoline Nucleus in Plants	123
Formation of the Quinoline Nucleus	131
Cinchona Alkaloids	132
Formation of Tropane Nucleus	133
Formation of Piperidine Nucleus	137
Formation of Pyridine Nucleus	139
Formation of Pyrrolidine Nucleus	140
The Ergot Alkaloids	142
Formation of the Pyrrole Nucleus	143
Formation of the Purine and Xanthine Nuclei	144

CHAPTER VIII GLYCOSIDES

General Discussion	146
The Cardiac Glycosides	151
Saponins	160

CHAPTER IX THE ANTHOCYANINS AND ANTHOXANTHINS

Anthocyanins	163
Color Reactions of	163
Leucocyanins	166
Anthoxanthins	167
Occurrence and Physiological Significance in Plants	169
Mechanism of Some Co-pigments	170
A Possible Phytochemical Synthesis	170
The Position of the Sugar in Anthocyanins, Flavones, etc.	171
Formation of Protocatechuic Acid	172
Formation of Gallic Acid	173

Formation of Para-hydroxy Benzoic Acid	173
Formation of Phloroglucinol	173

CHAPTER X

CAROTINOIDS

General Discussion	174
Phytochemical Synthesis of Carotenoids	180
Physiological Significance of Carotenoids	185
Color of the Carotenoids	185
Naturally Occurring Degradation Products of the Carotenoids	187
Methods for Isolating the Carotenoids	190

CHAPTER XI TANNINS

Occurrence	191
Physical and Chemical Properties	191
Classification	191
Presence and Fate of Tannins in Fruits	192
The Action of Iron Salts on Tannins	193
Precipitation of Gelatin and Proteins by Tannins	193
The Gold-Beater's Skin Test	193
The Action of Alkaloids with Tannins	193
The Action of Lead Salts with Tannins	194
Hydrolyzable Tannins	194
Gallotannin	194
Methylated Gallotannin	195
Acetyl-gallotannin	195
Hydrolysis of Gallotannin by Tannase	195
Hydrolysis of Gallotannin by Alkali	196
Hydrolysis of Gallotannin by Acid	196
Constitution of Gallotannin	196
Acer-Tannin	198
Glucogallin	198
Hamameli-Tannin	198
Ellagitannins	199
Myrobalan ellagitannin	199
Knoppergall ellagitannin	200
Caffetannin	200
Nonhydrolyzable or Condensed Tannins	201
The Catechins	201
Constitution of the Phlobatannins	205
Phlobaphene Formation	207
Unclassified Tannins	208

CHAPTER XII TERPENES AND OXYGENATED TERPENES

Nomenclature	210
Occurrence and Classification	212
Sesquiterpenes and Oxygenated Sesquiterpenes	222
Discussion of Individual Sesquiterpenes	222
Farnesol	222
Nerolidol	223
Bisabolene	223
Zingiberene	224
Beta-Selinene	224
Cadinene	224
Cadinol	225
Eudesmol	225
Chemistry of the Terpenes	225
Cyclization of Acyclic Terpene Aldehydes	226

Cyclization of Acyclic Terpene Alcohols	229
Cyclization of Acyclic Terpenes	231
Derivatives of the Terpenes	232
Influence of Dehydrating Agents upon Terpenes	237
Influence of Oxidizing Agents upon Terpenes	238

**CHEPTER XIII
VITAMINS**

General Discussion	239
Vitamin A	240
Vitamin D	244
Calciferol	244
Tachysterol	245
Lumisterol	245
Explanation of the U.S.P.XI Line Test	248
Vitamin C	249
Vitamin B1	252
Vitamin B2	255
Vitamin E	257
Vitamin F	257

CHAPTER XIV

ENZYMES

General Discussion	259
Activation and Inhibition of Enzymes	265
Coenzymes	267

**CHAPTER XV
PRODUCTS OF FERMENTATION**

Ethyl Alcohol	280
Mechanism of Alcoholic Fermentation	281
Butyl Alcohol-Acetone	283
Glycerol	286
Acetic Acid	287
Gluconic Acid	288
Lactic Acid	290
Citric Acid	290
Oxalic Acid	292
Fumaric Acid	293
Kojic Acid	294
Oxidation of Sugar Alcohols by Fungi	294
