

CONTENTS

1. Allelopathic Research in Agriculture: Past Highlights and Potential	1
2. Economics of Weed Control in Crops	9
3. Assessment of the Allelopathic Effects of Weeds on Field Crops in the Humid Midsouth	21
4. Chemistry and Biology of Allelopathic Agents	33
5. The Involvement of Allelochemicals in the Host Selection of Parasitic Angiosperms	55
6. Sessquiterpene Lactones and Allelochemicals from <i>Centaurea</i> Species	83
7. Fractionation of Allelochemicals from Oilseed Sunflowers and Jerusalem Arichokes	99
8. Biosynthesis of Phenolic Compounds: Chemical Manipulation in higher Plants	113
9. Allelopathic Agents from <i>Parthenium hysterophorus</i> and <i>Baccharis megapotamica</i>	149
10. Allelopathic Agents from <i>Parthenium hysterophorus</i> and <i>Baccharis megapotamica</i>	149
11. Effects of Allelochemicals on Mineral Uptake and Associated Physiological Processes	161
12. Effects of Allelochemicals on Plant-Water Relationships	179
13. Mechanisms of Allelopathic Action in Bioassay	197
14. Phytotoxic Compounds Isolated and Identified from Weeds	207
15. Phytotoxicity of Root Exudates and Leaf Extracts of Nine Plant Species	219
16. The Effect of Root Exudates on Soybeans: Germination, Root Growth, Nodulation, and Dry-Matter Production	235
17. Rye (<i>Secale cereale</i> L.) and Wheat (<i>Triticum aestivum</i> L.) Mulch: The Suppression of Certain Broadleaved Weeds and the Isolation and Identification of Phytotoxins	243
18. Allelopathy in Tall Fescue	273
19. Germination Regulation by <i>Amaranthus palmeri</i> and <i>Ambrosia artemisiifolia</i>	285
20. The Influence of Secondary Plant Compounds on the Associations of Soil Microorganisms and Plant Roots	301
21. Antimicrobial Agents from Plants: A Model for Studies of Allelopathic Agents?	327
22. A Survey of Soil Microorganisms for Herbicidal Activity	337
23. Use of bioassays for Allelochemicals in Aquatic Plants	351
24. Allelopathic Substances from a Marine Alga (<i>Nannochloris</i> sp)	371
25. Naturally Occurring Substances That Inhibit the Growth of <i>Hydrilla verticillata</i>	381
26. Oxygenated Fatty Acids: A Class of Allelochemicals from Aquatic Plants	387
27. Spikerush (<i>Eleocharis</i> spp.): A Source of Allelopathics for the Control of Undesirable Aquatic Plants	401
28. Improvements in the Synthesis of Strigol and Its Analogs	415
29. An Improved Partial Synthesis of (+)-Strigol	427
30. Strigol: Total Synthesis and Preparation of Analogs	437
31. Strigol Syntheses and Related Structure-Bioactivity Studies	445
Author Index	459
