

CONTENTS

Introduction	1
Aquatic Macrophyton Sampling : An Overview	2
Quantitative Methods for Assessing Macrophyte Vegetation	7
Aquatic Macrophyton Field Collection Methods and Laboratory Analyses	16
Biostatistical Aspects of Macrophyton Sampling	28
First-Order Error Analysis for Aquatic Plant Production	36
Development and Use of Waterways Experiment Station's Hydraulically Operated Submersed Aquatic Plant Sampler	46
The Osborne Submersed Aquatic Plant Sampler for Obtaining Biomass Measurements	58
Problems in the Use of Closed Chambers for Measuring Photosynthesis by a Lotic Macrophyte	69
Relationships Between Aquatic Macrophytes and the Chemical and Physical Composition of the Substrate in Kahle Lake, Clarion-Venango Counties, Pennsylvania	76
Mapping—Surface and Ground Survey	88
The Use of Aerial Remote Sensing in Quantifying Submersed	92
The Use of Small-Format Aerial Photography in Aquatic Macrophyton Sampling	100
Summary	113
Index	119
