

What results can one expect from an inventory of traditional medicine within a restricted area?	1
Current status of research on cultivation of medicinal plants in India	7
Cultivation of medicinal plants in India with special reference to eastern Himalayan regions	20
A critical review of the medicinal plant resources in Chinese flora: vascular plants used in Chinese medicine	30
Recent advances in the chemistry and biochemistry of thiamine	40
Chemistry, biology and pharmacology of new alkaloids from tropical poison-dart frogs	49
Medicinal chemistry of triterpenoid saponins	59
Some applications of biochemical techniques in pharmacognosy	71
Prediction of rules for the circular dichroism of natural products	83
Direct observation of biosynthetic pathways in living systems using ¹³ C-NMR spectroscopy	95
Structural studies on biologically active compounds X-ray structure determination: its role as a Modern technique of natural product chemistry	109
Alkaloids of the plant family Proteaceae	116
Observations on tropane and other ornithine-derived bases of Asian plants	125
Medicinal plants in New Zealand	136
Chemistry and the plant pathogen <i>Phytophthora cinnamomi</i>	149
The constituents of <i>Eupomatia laurina</i>	150
Molecular taxonomy a new approach to secondary plant constituents	161
Biogenetic theory and discovery of novel compounds from natural products	179
R.R.I.M.P. the search for biologically active marine natural products	180
Soft coral research at the James Cook University of North Queensland	197
Natural products displaying anticancer activity	205
The alkaloids of <i>Catharanthus roseus</i> 21 years of natural products chemistry	213
The synthesis of vinblastine, vincristine, vinrosidine, coronaridine and dihydrocatharan thine	222
Approaches to the total synthesis of maytansine	235
Tumor inhibitory Rubdosia diterpenes Novel synthetic approaches to the biologically active Heterocycles	250
New routes to morphine	261
Total synthesis of medicinal natural products	275
Synthesis of bazzanene, α - and β -barbatenes and gymnomitrol, constituents of liverwort species	284
Synthetic control leading to natural products	293
Dihydrobenzenes in synthesis of some natural products	303
The use of anthracene adducts in the synthesis of natural products	321
The use of transition metal compounds in the synthesis of organic natural products	330
New ring contractions of cyclic sulphur compounds	331
