

CONTENTS

1. Culture Collections as Sources of Strains for Industrial Uses	1
2. Yeast Selection in Nature	21
3. Classical Approaches to Yeast Strain Selection	43
4. Yeast Selection in Brewing	65
5. Wine Yeast: Selection and Modification	113
6. Yeast Selection for Baking	139
7. Yeast Strain Development for Extracellular Enzyme Production	185
8. Yeast Strain Selection for Fuel Ethanol Production	225
9. Transformation and Cloning Systems in Non-Saccharomyces	245
10. Host Cell Control of Heterologous Protein Production in <i>Saccharomyces cerevisiae</i>	311
11. Future Prospects	343
Index	347
