

CONTENTS

Foreword	iii
Introduction	vii
I Growth of cultures	1
Media	1
Temperature	2
Light	3
Aeration	3
PH	3
Water activity	4
II Preservation Techniques	5
Continuous growth	5
1 Frequent transfer	5
2 Storage under mineral oil	6
3 Soil storage	8
4 Water storage	9
Drying and preservation by induced dormancy	11
5 Silica gel storage	11
6 Freeze drying (lyophilization)	12
7 Liquid nitrogen storage	20
III Comparison of Methods of Preservation	27
Appendix 1 Formulae for media	31
Appendix 2 Growth conditions and preservation techniques of some common fungi	37
Appendix 3 Induction of sporulation in fungi by the use of near ultra-violet light	41
Appendix 4 Prevention of mite infestations	43
Appendix 5 List of suppliers	47
References	48
Index	51
