

## CONTENTS

Chapter 1 Introduction	1
PART ONE GENERAL CONCEPTS	
Chapter 2 Protoplasm	14
Chapter 3 Cells and Tissues	33
Chapter 4 Cell Metabolism	62
Chapter 5 Principles of Physiology	80
Chapter 6 Reproduction	113
PART TWO THE ANIMAL KINGDOM	
Chapter 7 The Principles of Taxonomy	138
Chapter 8 The Phylum Protozoa	146
Chapter 9 The Phylum Porifera	167
Chapter 10 The Phyla Coelenterata and Ctenophora	175
Chapter 11 The Phylum Platyhelminthes	196
Chapter 12 The Phyla Aschelminthes and Nemertea	210
Chapter 13 Introduction to the Higher Invertebrates	223
Chapter 14 The Phylum Mollusca	231
Chapter 15 Phylum Annelida	252
Chapter 16 Phylum Arthropoda	272
Chapter 17 Physiology and Behavior of the Arthropoda	305
Chapter 18 Minor Phyla	328
Chapter 19 The Phyla Hemichordata and Echinodermata	335
Chapter 20 The Chordates	355
PART THREEK VERTEBRATE LIFE AND ORGANIZATION	
Chapter 21 The Frog A Representative Vertebrate	366
Chapter 22 A History of Vertebrates: Fishes	393
Chapter 23 A History of Vertebrates: Amphibians and Reptiles	414
Chapter 24 A History of Vertebrates: Birds	435
Chapter 25 A History of Vertebrates: Mammals	452
Chapter 26 Protection, Support and Movement	469
Chapter 27 Digestion and Respiration	481
Chapter 28 Blood and Circulation	501
Chapter 29 The Urogenital System Excretion and Reproduction	522
Chapter 30 Sense Organs	536
Chapter 31 Nervous Coordination	548
Chapter 32 The Endocrine System	564
Chapter 33 The Development of Mammals	593
PART FOUR GENETICS AND EVOLUTION	

Chapter 34 Principles of Heredity	606
Chapter 35 Chemical and Mathematical Aspects of Genetics	633
Chapter 36 The Concept of Evolution	660
Chapter 37 The Evidence for Evolution	678
Chapter 38 The Evolution of Man	699
PART FIVE ANIMALS AND THEIR ENVIRONMENT	
Chapter 39 Ecology	714
Chapter 40 The Adaptation of Animals to the Environment	740
Chapter 41 Parasitism	759
Chapter 42 Conservation	779
APPENDIX	787
BIBLIOGRAPHY	799
INDEX	805
