

CONTENTS

Preface	vii
1. Dietary Calcium Exchangeability and Bioavailability: Evaluation and Potential Uses of an In Vitro Digestion Procedure.	1
E. M. Wien and Ruth Schwartz	
2. Assaying Calcium Bioavailability in Foods: Applicability of the Rat as a Model.	17
Arthur W. Mahoney and Deloy G. Hendricks	
3. Phosphates and Calcium Utilization in Humans.	29
Michael B. Zemel	
4. Calcium and Phosphate Needs of Preterm Infants Requiring Prolonged Intravenous Feeding.	41
P. J. Knight	
5. Dietary Phytate and Calcium Bioavailability.	51
Ernst Graf and John W. Eaton	
6. Bioavailability of Dietary Calcium: Effect of Phytate on Adult Men Consuming Nonvegetarian Diets.	63
Eugene R. Morris and Rex Ellis	
7. Urinary Acid and Calcium Excretion: Effect of Soy Versus Meat in Human Diets.	73
T. R. Watkins, K. Pandya, and O. Mickelsen	
8. Mouse Bone Composition and Breaking Strength: Effect of Varying Calcium and Phosphorus Content in Animal or Plant Protein-Based Diets.	89
Nweze Nnakwe and Constance Kies	
9. Effect of Oxalic Acid on Calcium Bioavailability.	105
June L. Kelsay	
10. Evidence for a Role for Insulin in the Hypercalciuretic Response to Macronutrients.	117
Lindsay H. Allen	
11. Effect of Dietary Protein, Calcium, and Phosphorus on Calcium Metabolism in Humans.	125
Juliette C. Howe	
12. Calcium Metabolism, Bone Mineral Loss, and Soft Tissue Calcification in Rodents: Effect of Phosphorus and Fluoride.	141
B. G. Shah and B. Belonje	
13. Effect of Certain Minerals on the Bioavailability of Calcium in Adult Males.	157
Herta Spencer and Lois Kramer	
14. Influence of Zinc on Calcium Bioavailability.	165
Aden C. Magee	

15. Effect of Dietary Fat and Fiber on Calcium Bioavailability	175
Constance Kies	
Author Index	189
Subject Index	189
