

CHAPTER ONE The Who, What and Why	
A Short history of Technical Illustration	5
Who Are the Illustrators?	6
What Is Illustration?	6
Where Is Illustration Used?	11
How Is Illustration Produced?	12
List of Terms	14
Questions for Further Study	14
CHAPTER TWO Aids and Guides	
Templates	16
Construction on Grids	18
Paste Up	18
Mechanical and Electronic Aids	19
Photographic Underlays	21
Computer Underlays	23
Basic Tools and Practices of Technical Illustration	24
List of Terms	39
Problems for Further Study	39
CHAPTER THREE	
Changing and Updating Illustration	
Keeping Track of Changes	46
Why Are Illustrations Changed?	46
Materials Used in Changing Illustrations	47
Methods of Changing Illustration	47
List of Terms	49
Problems for Further Study	50
CHAPTER FOUR Isometric Illustration	
Isometric Drawing and Isometric Projection	57
Methods of Construction in Isometric	59
Shapes in Isometric	62
List of Terms	66
Problems for Further Study	66
CHAPTER FIVE Advanced Axonometric Techniques	
Axonometric Theory	77
Axonometric Views	78
Special Construction Techniques	84
List of Terms	93

Problems for Further Study	94
CHAPTER SIX Perspective Drawing	
Drawing vs. Projection	104
The Basics of Perspective	105
Setting up a Perspective	110
Measuring Point Method	112
Intersection of Plane Surfaces	116
Perspective with the Ease of Isometric	117
List of Terms	119
Problems for Further Study	120
CHAPTER SEVEN Presentation of Illustrations	
The Psychology of Presentation	126
What Makes an Effective Presentation?	129
Drawing Format	130
Design Illustration	141
Mark Numbers	143
List of Terms	143
APPENDIX A Work Problems	145
APPENDIX B Fasteners and Equipment	163
APPENDIX C Tables	175
APPENDIX D Scales and Grids	178
Scales and Grids	178
References	193
Index	194
