Preface xix
Acknowledgments xxi
In memory of Chris Waters xxiii
Author xxv

Chapter 1 Introduction 1
Hazardous materials statistics 5
DOT/UN hazard classes of hazardous materials 7
NFPA 704 marking system 8
Health 12
Flammability 13
Reactivity (stability) 13
Chemical characteristic listings and incidents 14
Chemical and physical characteristics: Training competencies 15
OSHA 1910.120 15
Operations level 16
Technician 16
Specialist 16
Awareness 17
Operations 17
Technician 19
Incident commander 22
Review questions 23

Chapter 2 Basics of chemistry 25
Periodic table of elements 26
Elements 27
Atomic number 28
Atomic weight 28
Hazmat elements 32
Hydrogen 32
History 33
Sources 34
Important compounds 34
Uses 34
Isotopes 35

Important reactions 35
Hazards to responders (Photo 2.2) 35
Lithium 36
History 37
Sources 37
Important compounds 37
Uses 38
Isotopes 38
Important reactions 38
Hazards to responders 38
Sodium 39
History 39
Sources 39
Important compounds 40
Uses 40
Isotopes 40
Hazards to responders 40
Potassium 41
History 41
Sources 41
Important compounds 42
Uses 42
Isotopes 42
Important reactions 42
Hazards to responders 42
Beryllium 43
History 43
Sources 43
Important compounds 43
Uses 44
Isotopes 44
Important reactions 44
Hazards to responders 44
Magnesium 44
History 45
Sources 45
Important compounds 45
Uses 45
Isotopes 46
Important reactions 46
Hazards to responders 46
Calcium 46
History 47
Sources 47
Important compounds 47
Uses 47
Isotopes 47
Important reactions 47
Hazards to responders 48

Barium 48
History 49
Sources 49
Important compounds 49
Uses 49
Isotopes 49
Important reactions 49
Hazards to responders 49
Titanium 50
History 50
Sources 50
Important compounds 51
Uses 51
Isotopes 51
Important reactions 51
Hazards to responders 51
Chromium 52
History 52
Sources 52
Important compounds 52
Uses 53
Important reactions 53
Hazards to responders 53
Manganese 54
History 54
Sources 54
Important compounds 54
Uses 55
Isotopes 55
Important reactions 55
Hazards to responders 55
Iron 56
History 56
Sources 56
Important compounds 56
Uses 57
Isotopes 57
Important reactions 57
Hazards to responders 57
Cobalt 58
History 58
Sources 58
Important compounds 58
Uses 59
Isotopes 59
Important reactions 59
Hazards to responders 59
Copper 59
History 60

Sources 60
Important compounds 60
Uses 60
Isotopes 61
Important reactions 61
Hazards to responders 61
Silver 61
History 62
Sources 62
Important compounds 62
Uses 62
Isotopes 63
Important reactions 63
Hazards to responders 63
Gold 63
History 64
Sources 64
Important compounds 64
Uses 64
Isotope 64
Important reactions 65
Hazards to responders 65
Zinc 65
History 65
Sources 66
Important compounds 66
Uses 66
Isotopes 66
Important reactions 66
Hazards to responders 67
Mercury 67
History 67
Sources 67
Important compounds 68
Uses 68
Isotopes 68
Important reactions 68
Hazards to responders 68
Boron 69
History 69
Sources 69
Important compounds 70
Uses 70
Isotopes 70
Important reactions 70
Hazards to responders 71
Aluminum 71
History 71
Sources 72

Important compounds 72
Uses 72
Isotopes 72
Important reactions 72
Hazards to responders 73
Carbon 73
History 74
Sources 74
Important compounds 74
Uses 75
Isotopes 75
Important reactions 75
Hazards to responders 75
Silicon 75
History 76
Sources 76
Important compounds 76
Uses 76
Isotopes 77
Important reactions 77
Hazards to responders 77
Nitrogen 77
History 78
Sources 78
Important compounds 78
Uses 79
Isotopes 79
Important reactions 79
Hazards to responders 79
Phosphorus 80
History 81
Sources 81
Important compounds 81
Uses 81
Isotopes 81
Important reactions 82
Hazards to responders 82
Arsenic 82
History 83
Sources 83
Important compounds 83
Uses 84
Isotopes 84
Important reactions 84
Hazards to responders 84
Plutonium 84
History 85
Sources 85
Important compounds 85

Isotopes 109
Important reactions 110
Hazards to responders 110
Compounds and mixtures 110
Solubility 111
Atom 112
Formulae 113
Ionic bonding 115
Covalent bonding 116
Salts 118
Binary salts 121
Binary oxides (metal oxides) 122
Peroxide salts 122
Hydroxide salts 123
Complex ions (polyatomic) 123
Oxysalts 123
Cyanide salts 125
Ammonium salts 125
Inorganic nonsalts 126
Binary nonsalts 126
Nonmetal oxides 127
Binary acids (inorganic acids) 128
Oxyacids (inorganic acids) 128
Inorganic cyanides 129
Nonmetal compounds 129
Physical and chemical terms 132
Review questions 133

Chapter 3 Explosives 135
Definition of explosion 136
Categories of explosions 136
Phases of explosions 136
Mechanical overpressure explosions 137
Mechanical/chemical explosions 138
Chemical explosions 138
Dust explosions 138
Nuclear explosions 141
Components of a chemical explosion 142
Types of chemical explosives 142
Forbidden explosives for transportation 145
Types of chemical explosions 145

Explosive effects 146
Yield vs. order 147
Division 1.1–1.3 explosives 148
Explosive families of compounds 148
Inorganic explosive compounds 148
Metal azides 149
Aliphatic explosive compounds (nitro hydrocarbon derivatives) 149
Aromatic explosive compounds 152
Incidents 154
Explosives subclasses 1.4–1.6 155
Explosive chemicals 156
Incidents 158
Homemade explosives/terrorist explosives 165
Military explosives 170
Summary 174
Review questions 175

Chapter 4 Compressed gases 177
Flammable gases 180
Flammable range 180
Vapor density 181
Flammable gas elements 182
Hydrocarbon families 183
Alkanes 185
Isomers 186
Alkenes 188
Common alkenes 189
Alkynes 190
Hydrocarbon derivatives 191
Common hydrocarbon derivatives 193
Incidents 194
Nonflammable compressed gases 204
MRI and NMR facilities 209
Hydrocarbon derivatives 212
Nonflammable gas compounds 213
Incidents 218
Poison gases 220
Incidents 225
Summary 225
Review questions 226

Chapter 5 Flammable liquids 229
Effects of temperature on flammable liquids 230
Boiling point 232
Factors affecting boiling point 233
Molecular weight 233
Polarity 233
Branching 237
Flash point 238

Ignition temperature 238
Flammable range 240
Vapor pressure 242
Vapor content 243
Vapor density 243
Specific gravity 244
Polymerization and plastics 244
Animal and vegetable oils 246
Fire-extinguishing agents 248
Hydrocarbons 252
Isomers 253
Cyclic alkanes 255
Hydrocarbon derivatives 262
Alkyl halide 264
Amines 266
Ethers 267
Alcohol 271
Isomers 279
Ketone 281
Aldehyde 283
Esters 285
Organic acids 288
Other flammable liquids 289
Incidents 291
Review questions 298

Chapter 6 Flammable solids 301
Class 4.1 flammable solids 302
Flash-point solids/sublimation 304
Flammable particles and dusts 307
Class 4.2 spontaneous combustibles 309
Pyrophoric solids and liquids 311
Incidents 314
Class 4.3 dangerous when wet 316
Incidents 320
Fire-extinguishing agents 321
Review questions 321

Chapter 7 Oxidizers 323
Class 5.1 oxidizers 323
Oxysalts 327
Peroxide salts 331
Inorganic acid oxidizers 331
Other oxidizer compounds 334
Incidents 335
Class 5.2 organic peroxides 336
Incident 343
Review questions 343

Chapter 8 Poisons **345**
Types of exposure 348
Routes of exposure 348
Effects of exposure 350
Short-term effects 350
Long-term effects 352
Etiologic effects 353
Variables of toxic effects 353
Dose/response 353
Susceptible target organs 354
Exposure rate 355
Defense mechanisms for toxic materials 357
Toxic elements 358
Toxic salts 359
Toxic hydrocarbons 360
Toxic hydrocarbon derivatives 360
Alkyl halides 361
Amines 363
Cyanides and isocyanates 363
Alcohols 364
Aldehydes 365
Organic acids 366
Phosphoric esters 366
Miscellaneous toxic materials 366
Pesticides 369
Other toxic materials 374
Military and terrorist chemical agents 377
Chemical agents 377
Nerve agents 379
Antidotes 382
Mustard agents (vesicants) 383
Blood agents (cyanogens) 388
Choking agents (lung-damaging agents) 390
Riot-control agents (irritant agents and vomiting agents) 391
Vomiting agents 393
Miscellaneous chemical agents 394
Infectious substances 394
Bacterial agents 396
Viruses 404
Toxins 408
Chemistry of clandestine drug labs 413
Summary 415
Review questions 415

Chapter 9 Radioactive materials **417**
History of radiation 417
Types of radiation 419
Isotopes 421
Regulation of radioactive materials 422

Intensity of radiation 424
Radiation exposure 427
Radioactive elements and compounds 429
Uranium compounds 430
Radium compounds 431
Cobalt 431
Iodine 432
Krypton 432
Radon 432
Department of Energy Nuclear Emergency Search Team 433
Review questions 434

Chapter 10 Corrosives 435
Inorganic acids 435
Strength and concentration 437
pH 438
Organic acids 441
Dilution vs. neutralization 448
Incidents 451
Review questions 452

Chapter 11 Miscellaneous hazardous materials 453
Elevated-temperature materials 454
Other miscellaneous hazardous materials 457
Incidents 459
Review questions 460

Chapter 12 Incompatible and unstable chemicals 461
Acids and bases 461
Oxidizers and organic materials 461
Aging chemicals 463
Unstable functional groups 467
Water- and air-reactive materials 467
Basic chemical storage segregation (Tables 12.6 and 12.7) 470

Appendix 477
Glossary 493
References 509
Index 511
