

Chapter 1	
Biomedical Polymers: Current Status and Overview	1
Hiroshi Tanzawa	
Chapter 2	
Interactions Between Polymers and Biosystems	
2.1 Structure-Property Relationships of Biomedical Polymers	17
2.2 Biological Response to Biomedical Polymers	53
Chapter 3	
Biocompatible Polymers	
3.1 Blood Compatible Polymers	89
3.2 Soft Tissue Compatible Polymers	117
3.3 Hard Tissue Compatible Polymers	143
3.4 Biodegradable Polymers	163
Chapter 4	
Polymer Materials for Some Therapeutic Applications	
4.1 Polymer Materials for Blood Purification	191
4.2 Dental Biomaterials	219
4.3 Polymeric Materials for Oculistics	257
4.4 Polymer Materials for Hybrid Artificial Organs	273
Chapter 5	
Polymer Materials for Bioanalysis and Bioseparation	
5.1 Microspheres for Diagnosis and Bioseparation	299
5.2 Material Design for the Fabrication of Enzyme Sensors	325
5.3 Polymeric Materials for Cell Separation	345
Chapter 6	
Polymers for Pharmaceutical and Biomolecular Engineering	
6.1 Polymer Drugs and Polymeric Drugs	371
6.2 Intelligent Polymeric Materials for Drug Delivery	407
Chapter 7	
Biological Safety of Biomaterials and Devices	429
Chapter 8	
Prospects for Future Progress	469
Index	475
