

CONTENTS

| | |
|---|-----|
| PART I: BUSINESS AND REGULATORY CONSIDERATIONS | |
| Biotech Polymers: What They Are and What They Do | 3 |
| Biopolymers: Key Companies, Technologies, and Products | 17 |
| Regulatory Considerations for Biotechnology Applications | 22 |
| PART II: MEDICAL AND PHARMACEUTICAL APPLICATIONS | |
| Merging Frontiers of Biotechnology in Pharmaceutical and Polymer Applications | 29 |
| Biological Activities of Hydroxyl-Containing Natural Products Emphasizing Tin-Containing Products | 34 |
| Applications of Hyaluronan and Its Derivatives | 41 |
| Collagen Biotechnology of Bioelastic Materials | 82 |
| Melanin, the Natural Biopolymer for Ultraviolet Protection | 104 |
| Polymer Coatings in Biomedical Applications | 123 |
| Biotechnological Diagnostic Polymers and Coatings | 139 |
| PART III: BIODEGRADABILITY AND APPLICATIONS | |
| Plastics in the Environment-The Gathering Storm | 175 |
| Requirements to Define Biodegradable Polymers | 191 |
| Polymers from Biotechnology: Bacterial Polyesters and γ -Poly(glutamic acid) | 200 |
| Biodegradable Polymers for Packaging | 214 |
