CONTENTS

- 1 The Antitumor Activity of 6α -Methyl-17 α -Acetoxy Progesterone (MPA) in Experimental Mammary Cancer
- 21 Effects of Medroxyprogesterone Acetate (MPA) on Growth of DMBA-Induced Rat Mammary Tumors: Histopathological and Endocrine Studies
- 29 Aspects of the Rationale to Hormono and Hormono-Chemotherapy in Advanced Breast Cancer
- 53 High Dose Medroxyprogesterone Acetate (HD-MPA) Combined with Chemotherapy for Metastatic Breast Carcinoma
- 65 A Phase III Trial of Treatment with Tamoxifen Versus Treatment with High Dose Medroxyprogesterone-Acetate in Advanced Postmenopausal Breast Cancer
- 73 Medroxyprogesterone Acetate in Treatment of Metastatic Breast Cancer: Seven Years of Experience
- 93 High Doses of Medroxyprogesterone Acetate (MPA) in the Treatment of Metastatic Breast Cancer
- 97 Progesterone Receptors and Hormone Sensitivity of Human Endometrial Carcinoma
- 107 Cyto-Histologicla Observations of the Endometrial Adenocarcinoma Before and After Treatment with 6-Methyl-17-Hydroxyprogesterone Acetate (MPA)
- 137 Progestins in Advanced Endometrial Cancer
- 145 Subject Index
