

## CONTENTS

Source and Biosynthesis	
Chapter 1 Natural Source and Biosynthesis of $\gamma$ -Linolenic Acid: An Overview	1
Chapter 2 Pathways for the Biosynthesis of Polyunsaturated Fatty Acids	14
Chapter 3 Biosynthesis of $\gamma$ -Linolenic Acid in the Cyanobacterium <i>Soirulina Platensis</i>	22
Chapter 4 Enzymatic Enrichment of $\gamma$ -Linolenic Acid from Black Currant Seed Oil	33
Absorption and Metabolism	
Chapter 5 Transport of Long-Chain Polyunsaturated Fatty Acids Across the Human Placenta: Role of Fatty Acid-Binding Proteins	42
Chapter 6 Absorption of $\gamma$ -Linolenic Acid from Borage, Evening Primrose, and Black Currant Seed Oils. Fatty Acid Profiles, Triacylglycerol Structures, and Clearance Rates of Chylomicrons in the Rat	54
Chapter 7 Metabolism of [3-13c] $\gamma$ -Linolenic Acid in the Suckling Piglet and Rat	66
Chapter 8 In Vivo and In Vitro Metabolism of Linoleic and $\gamma$ -Linolenic Acids	84
Inflammation and Immune Response	106
Chapter 9 $\gamma$ -Linolenic Acid and Immune Function	106
Chapter 10 The Biological/Nutritional Significance of $\gamma$ -Linolenic Acid in the Epidermis: Metabolism and Generation of Potent Biological Modulators	118
Chapter 11 $\gamma$ -Linolenic Acid Inflammation, Immune Responses, and Rheumatoid Arthritis	129
Chapter 12 The Anti-Inflammatory Role of $\gamma$ -Linolenic and Eicosapentaenoic Acids in Acute Lung Injury	137
Cardiovascular Disease and Hypertension	
Chapter 13 Effects of Feeding a Supplement of $\gamma$ -Linolenic Acid Containing Oils with Fish Oil on the Fatty Acid Composition of Serum Phospholipids in Healthy Volunteers	168
Chapter 14 Comparative Evaluation of the Hypocholesterolemic Effect of Octadecatrienoic Acids	175
Chapter 15 $\gamma$ -Linolenic Acid Attenuates Blood Pressure Responses to Environmental Stimuli: Implications for Human Essential Hypertension	189
Chapter 16 $\gamma$ -Linolenic Acid: A Potent Blood Pressure Lowering Nutrient	200
Chapter 17 Impact of Dietary $\gamma$ -Linolenic Acid on Macrophage-Smooth Muscle Cell Interaction: Down-Regulation of Vascular Smooth Muscle Cell DNA Synthesis	218
Development	
Chapter 18 Effects of $\gamma$ -Linolenic Acid on Brain Fatty Acid Composition and Behavior in Mice	227
Chapter 19 $\gamma$ -Linolenic Acid in Infant Formula	246
Diabetes and Cancer	
Chapter 20 $\gamma$ -Linolenic Acid Biosynthesis and Chain Elongation in Fasting and Diabetes Mellitus	252
Chapter 21 Essential Fatty Acids in the Management of Diabetic Neuropathy	273
Chapter 22 Anti-Cancer Actions of $\gamma$ -Linolenate (LiGLA) in Human Prostate Ovarian, and Pancreatic Carcinomas Grown in Nude Mice	293

Regulatory Status	
Chapter 24 Global Regulatory Status of $\gamma$ -Linolenic Acid	304
Index	311
