

CONTENTS

Section I. Introduction	
1. THE SCOPE OF THE SMPOSIUM: OUTLINE OF CURRENT PROBLEMS RELATED TO SULFUR IN NUTRITION.	1
Section II. Chemistry and Biochemistry of Sulfur and Its Compounds	
2. THE CHEMISTRY OF THE SULFUR-SULFUR BOND	6
3. IMPLICATION OF THE SLFYDRYL RESIDUES IN THE BIOLOGICAL FUNCTIONING OF MYOSIN	31
4. TRANSMETHYLATION REACTIONS	36
5. CONTROL OF SULFUR METABOLISM IN MAMMALS	46
6. SULFUR REQUIREMENTS AND METABOLISM OF MICROORGANISMS	61
Section III. Sulfur in Plant Nutrition	
7. SULFUR REQUIREMENT AND METABOLISM IN PLANTS	80
Section IV. Sulfur in Animal Nutrition	
8. METABOLISM OF SULFATE ESTERS	97
9. THE NEED FOR SULFUR IN THE DIET OF RUMINANTS	126
10. EFFECTS OF SULFUR DEFICIENCY ON METABOLISM IN SHEEP	153
11. IMPLICATIONS OF THE N:S RATIO AND DIFFERENTIAL RECYCLING	165
12. THE USE OF TRACER TECHNIQUES TO STUDY THE SULFUR CYCLE IN GRAZED PASTURES	182
13. SULFUR NUTRITION OF NONRUMINANT SPECIES	196
Section V. Sulfur in Human Nutrition	
14. SULFUR REQUIREMENTS OF THE HUMAN	209
15. ERRORS OF SULFUR METABOLISM	222
Section VI. Conclusion	
16. SUMMATION AND DISCUSSION	244
Index	249
