

CONTENTS

PART I: NATURE, OCCURRENCE AND CHARACTERIZATION OF BIOLOGICALLY IMPORTANT FATS	
Chapter 1 Some Definitions: Fat, Food and Nutrition	3
Bibliography	4
Chapter 2 Types of Fat in the Body and Their Functions	7
2.1 Introduction	7
2.2 Structural fats	7
2.3 Storage fats	16
2.4 Metabolic fats	18
2.5 Fats in transit	19
2.6 Summary	20
Bibliography	20
Chapter 3 Fats in Food	21
3.1 Sources of dietary fats	21
3.2 Composition of food fats	21
3.3 How industrial and domestic processes can modify the composition of food fats	40
Chapter 4 Determination of the Amounts and Types of Fat in Foods and Diets	53
4.1 Introduction: What do we need to know and why?	53
4.2 Extraction and measurement of total fat in foods	55
4.3 Measurement of the energy value of fats	57
4.4 Determination of individual fat components	58
4.5 The measurement of fats consumed in the diet	67
4.6 Summary	71
Bibliography	72
PART II: THE METABOLIC AND NUTRITIONAL ROLES OF FATS	
Chapter 5 How Fats are Processed in the Body: Some Basic Metabolism	77
5.1 Introduction	77
5.2 Digestion and absorption of fats	77
5.3 Transport of absorbed fats	81
5.4 Biosynthesis of fats	88
5.5 Breakdown of tissue lipids	92
5.6 Summary	94
Bibliography	94
Chapter 6 The Importance of Fat in the Diet	97
6.1 The consumption of fat in diets	97
6.2 Why do we eat fat?	103

6.3 The special place of milk in diets and the roles of milk fat	113
6.4 Summary	119
Bibliography	119
Chapter 7 Fats that are Essential in the Diet	121
7.1 Introduction	121
7.2 The essential fatty acids	121
7.3 Fat-soluble vitamins	137
7.4 Summary	144
Bibliography	145
Chapter 8 Fats in Health and Disease	147
8.1 Introduction: The concepts of nutrient requirements and a 'balanced' intake of nutrients	147
8.2 Dietary fats alleged to be toxic or to have toxic effects under some circumstances	149
8.3 Diseases in which there is a genetic defect involving some aspect of lipid metabolism	160
8.4 Diseases in which dietary fats may play a contributory role	165
8.5 Nutritional measures taken for the prevention or management of disease: Dietary guidelines and the role of fat	185
8.6 Summary	196
Bibliography	197
Index	199
